Job Title: Software Quality Assurance Engineer

Company Name: TechCare® Inc.

Share   

TechCare® Inc.

Dhaka, Dhaka, Bangladesh

Position: 1

Job Type: Full-Time

Work Model: Hybrid

Are You the Bug Whisperer We've Been Searching For?

Do you have a sixth sense for spotting errors, an uncontrollable urge to break things (only to fix them better), and a knack for turning chaos into quality? Join TechCare Inc. as a Software Quality Assurance Engineer and help us deliver software so flawless, it feels magical.

About Us:

At TechCare Inc., we don't just build software—we create experiences. Headquartered in Edmonton, Canada, with a buzzing branch in Dhaka, Bangladesh, we're a team of tech dreamers building cutting-edge solutions for clients across the globe. But even dreamers need realists like you—because nothing crushes a great app faster than a sneaky bug!

Your Mission (Should You Choose to Accept It):

- **Hunt Bugs Mercilessly:** Test, break, and uncover bugs before our users do (we'll reward your destruction with praise).
- **Design & Execute Tests:** Develop test cases that make our software quake in its boots.
- **Collaborate with Developers:** Be the gatekeeper of quality, working closely with developers to make everything flawless (or at least close).
- **Automate Like a Pro:** If it's repetitive, automate it. Be the hero who saves everyone's time.
- **Keep Users Happy:** Ensure every release is a joy to use and doesn't leave users scratching their heads.

Your Superpowers:

- **Experience: 3-5 years** in software QA or testing, or you've been the go-to "break-this-and-tell-me-what's-wrong" person.
- **Eye for Detail:** If something's wrong, you'll find it—even if it's hiding behind 1,000 lines of code.

anything else you are open to participating in any of them.

- **Automation Ninja:** Automation is your comfort food and you are familiar with automation of the testing process and seek every single opportunity to adapt it into your testing spree.
- **Test Management and Coverages:** You are Experienced with Test Management tools (Like, Jira), Bug tracking and Tracing, Performance Testing (Like, Selenium), or something like these tools.
- **Team Player Vibes:** Developers may fear you, but they'll love you for making them look good.
- **Tech-Savvy Mindset:** You know your way around agile methodologies and testing frameworks.

☀️ Why Join Us?

- Collaborate with TechCare's **Canada team**.
- Competitive salary, **2X** festival bonuses, and annual reviews.
- Paid parental leave for maternity and paternity.
- **Provident fund & Profit Sharing** for financial stability.
- **Hybrid** work options to support work-life balance.
- Free breakfast, lunch, snacks, coffee and more
- World-class work environment and the **brand new office** in Mirpur DOHS
- Access to professional courses, team outings, and much more.

🚩 Ready to Test Your Limits (and Ours)?

Apply now and help us create software that's not just good—it's bulletproof. Together, we'll squash bugs, deliver excellence, and maybe have a few laughs along the way.
