Company Name: BrainX Technologies

Share   

Job Details

We are looking for a **Fresh Software Quality Assurance Engineer** to develop and execute exploratory and automated tests to ensure product quality. You will be working alongside other engineers and developers working on different layers of the infrastructure. Therefore, a commitment to collaborative problem-solving, sophisticated design, and the creation of quality products is essential.

Job Responsibilities

- Review functional and design specifications to ensure full understanding of individual deliverables.
- Identify test requirements from specifications, map test case requirements, and design test coverage plans.
- Estimate, prioritize, plan, and coordinate testing activities.
- Identify bugs, log defects, and any nonconformity found during the testing phase; work with the development team to resolve and verify fixes when implemented.
- Monitor debugging process results.
- Execute Test cases for functional and end-to-end integration testing.
- Developed Daily status Report & Test summary report for Client.
- Suggest improvements in existing company processes especially related to Quality assurance.

Skills Required

- BS/MS degree in Computer Science, Software Engineering, or a related subject.
- Basic understanding of software testing principles and methodologies.
- Experience in load testing, stress testing, and performance testing.
- Experience working on high-traffic and large-scale Software products will be a plus.
- Excellent written and verbal communication skills.
- Highly self-motivated and proven Analytical and Problem-Solving skills.
- Ability to work both independently and in a collaborative environment.

pay, medical benefits, and frequent appraisals).
