Job Title: Website Tester

Company Name: RITICLE

Share

About RITICLE:

RITICLE is an innovative AI-powered platform that assists users in writing reports and assignments seamlessly.

Responsibilities:

- Test the RITICLE website's functionality, performance, load balancing and responsiveness across various devices and browsers.
- Conduct end-to-end testing of core features, focusing on AI-powered writing tools.
- Verify the integration and performance of the Next.js frontend, Express backend, and MongoDB database.
- Identify, document, and report bugs or inconsistencies in the user experience.
- Test the user flow from registration to generating documents.
- Ensure compliance with accessibility standards.
- Suggest improvements for usability and performance.

Qualifications:

- Experience with testing web applications.
- Manual QA testing experience working on web-based SaaS products
- Experience with testing tools like Cypress, Selenium, or Postman.
- Good Understanding of performance and load testing.
- Proficiency in manual and automated testing techniques.
- Good understanding of API testing and database queries.
