Job Title: Software Quality Assurance Tester

Company Name: meldCX

Share

About the job

meldCX is looking for a passionate Software QA tester to join and strengthen an already established and capable core team. Our Software QA engineers play an integral part in our development life cycle. Your responsibilities will include designing and performing both manual testing and automated tests, identifying system/test failures, and continuously improving tests and testing techniques to ensure our products maintain the highest levels of reliability, maintainability, usability, and performance. Work with major technology and industry brands in the US, Europe, and Australia.

If you are someone who loves working on diverse and interesting projects that will push your boundaries and encourage you to learn new skills, then meldCX is the place for you.

Key skills and background:

- Excellent analytical and problem-solving skills and out-of-the-box thinking abilities
- Excellent verbal and written communication skills
- Expert knowledge of JavaScript
- 5+ years of practical experience in a QA or related role
- UI – Testing the front end of web applications
- Experience with cypress.io or vorlonjs.io will be highly regarded.
- ChromeOS & Node js knowledge would be advantageous
- command line experience in Windows and Linux is highly beneficial but not required.
- Experience in testing web services (preferably JSON, SOAP, REST),
- Experience working within Agile development projects (including in-sprint testing)
- Test pipeline automation experience will be highly regarded

Some of the Perks:

Free snacks and lunch, virtual team events, hardware provided, flexible vacation policy, yearly performance reviews, competitive salary packages and professional training and development.

If you think you are the right candidate for this position and meet all the requirements, we structure our salary packages based on technical level and experience.

We strive to create an inclusive workplace that promotes and values diversity and inclusion. So come join our team! We can't wait to meet you. The applicant will be appointed by Maple IT

you will receive feedback and if you are successful you will progress to the cultural fit interview then followed by the technical interview with our Technical Lead and Final interview with Senior Management. Our salary packages are dependent on your technical ability and years of experience so they are structured on an individual basis for each applicant.

Work Location: Maple IT Solutions, H- 16, R-04, Nikunja-1, Dhaka
