Job Title: Junior QA Engineer

Company Name: Kyla

Share   

About the project

Kyla is a medical startup that is focused on developing software that brings together the latest advancements in medical knowledge with state-of-the-art AI technologies. Kyla's software is designed to help healthcare professionals provide better care to patients by leveraging the power of AI to improve diagnostic accuracy, optimize treatment plans, and streamline administrative processes.

About the opportunity

We are looking for a detail-oriented Junior plus QA Engineer with strong knowledge of mobile and web manual testing. In this role, you will be responsible for ensuring the quality and reliability of our mobile and web applications, by designing and executing comprehensive test plans.

Responsibilities:

- **Application Testing:**
 - Conduct manual testing of mobile and web applications to identify defects, inconsistencies, and usability issues.
 - Create and execute test cases, scripts, and scenarios.
 - Report and track defects, collaborating closely with developers for timely resolution.
 - Perform regression testing to ensure the stability of new releases.
- **Test Documentation:**
 - Prepare detailed test plans, cases, and reports.
 - Maintain documentation for test processes, results, and issues.
 - Continuously improve testing procedures and documentation.
- **Cross-functional Collaboration:**
 - Collaborate with developers, product managers, and other stakeholders to understand project requirements and ensure testing aligns with business objectives.
 - Review requirement documents before development and provide feedback.
 - Participate in Agile/Scrum meetings, offering insights and feedback on product quality.

Qualifications:

- Successfully completed courses in manual testing.
- Strong knowledge of SDLC and CI/CD processes.
- Proficient with various testing tools.
- Excellent problem-solving skills and attention to detail.

- Passionate about staying current with the latest trends and technologies in software QA.

As a plus:

- Any commercial experience as a QA engineer.
- Knowledge of API testing principles and proficiency with Postman or similar tools.
- Basic understanding of software development, including HTML/CSS, JavaScript, or foundational coding principles.

What we offer you:

- 100% remote job;
- Flexible work hours;
- Personalized development plan for your professional and career growth;
- Working directly for a USA product company while developing innovative AI-driven healthcare.

Looking forward to meeting you soon!
