### Job Title: Intern QA Automation

Company Name: MoEngage

Share   

About MoEngage is an insights-led customer engagement platform, trusted by 1,200+ global consumer brands. As a Great Place to Work Company, we are a young, fast-paced, and intelligent customer engagement platform that fosters a culture of innovation, ownership, freedom, and fun while building future-ready technology products. Sitting at a conflux of diverse technologies like Artificial Intelligence, Big Data, Web & Mobile platforms, MoEngage technology analyzes billions of data points generated by customers and their devices to predict their behavior and engage them at every touchpoint throughout their lifecycle with personalized communication. In just eight years since our inception, we have worked with leading Fortune 500 brands such as Deutsche Telekom, Samsung, Ally Financial, Vodafone, and McAfee along with internet-first brands such as Flipkart, Ola, OYO, Bigbasket, and Sharechat, with a global presence that encompasses 35 countries. We currently have offices in San Francisco, Boston, London, Dubai, Ho Chi Minh City, Bangkok, Kuala Lumpur, Singapore, Sydney, Vietnam, Berlin, Jakarta, and Bengaluru. The care we give to our customers is quite high! Our achievement of top service and support ratings in Gartner's Magic Quadrant, Gartner Peer Insights, and G2 Summer Reports is a testament to that. Another commendable quality is our people-centric culture, as we have recently been included in Battery Ventures' top 25 private cloud computing companies. As recognized by the DivHERsity Awards, we are one of the top 20 diversity companies in the world, while the Economics Times names us as one of the Top Organizations for Women.

### What We're Looking For:

- **Programming Skills:** Proficiency in JavaScript, or Python is a must. You don't need to be a coding master yet, but having some experience will help you get a head start
- **Learners, First and Foremost:** We don't expect you to know everything - but we do expect you to be hungry to learn. If you're curious and passionate about growing your skills, we're here to mentor you!
- **Go-Getters:** We need people who take initiative, roll up their sleeves, and get things done. You're not the type to wait for direction - you're always thinking ahead and ready to tackle challenges
- **Availability & Dedication:** We're looking for interns who can bring their energy to the table. You need to be available, focused, and ready to contribute as part of a fast-paced, innovative team
- **Quick Adaptability:** The tech world moves fast, and so do we! You should be able to pick up new tools, technologies, and methodologies quickly
- **Problem-Solvers:** When problems arise, you're excited to find creative solutions. Whether it's collaborating with teammates or diving deep into code, you thrive on making things work

- Contribute to quality engineering, automation testing, and continuous integration practices with an emphasis on back-end API, systems integration, UI automation, and Performance Testing.
- Work with multiple teams spread across India for continuous improvements, innovative and own initiatives
- Design and develop frameworks and robust automation test scripts
- Conduct code reviews to manage automation code quality and guide teams for improvements and adherence to best practices.
- Works on ongoing projects and assignments of diverse scopes apply broader knowledge of industry standards/practices and own complete quality for module/s with minimal to no supervision needed.
- Work closely with product and development teams for scoping/sizing after clarifying requirements and creating the strategy and technical design for quality delivery.
- Participate in sprint planning meetings and daily stand-ups work with teams and adapt to changing needs in a fast-moving environment.

### Minimum Qualifications

- BS/B Tech degree in Computer Science from a reputed institution.
- Strong understanding of computer science fundamentals and data structures.
- Knowledge of open-source automation tools.
- Understanding QA methodologies, life cycle and processes, and project management techniques.

### What You'll Gain:

- Internship Certificate: Upon successful completion of the internship, you will receive an official internship certificate from MoEngage, validating your contribution and learnings.
- Potential Full-Time Opportunity: Exceptional performers may be considered for a full-time role based on performance and business needs.
- Real-World Experience: Hands-on experience with automated testing frameworks, software development projects, and collaboration with various teams.
- Mentorship & Development: Guidance from experienced SDETs, developers, and product managers to accelerate your learning and professional growth.
- Career Growth: Become a Subject Matter Expert (SME) in test automation, with opportunities to take on increasing responsibility and ownership over time.
- Domain knowledge: Good exposure to sales and marketing automation.
