### Job Title: Senior SQ Engineer

Company Name: BRAC IT SERVICES LTD.

Share   

BRAC IT Services Limited is an innovative IT company dedicated to excellence and quick expansion. We presently have openings on our team for bright individuals, and we also offer exciting career prospects in various positions. To develop top-notch, scalable software solutions, BRAC IT promotes an environment of invention and teamwork. Come help us shape the direction of global IT services and technology.

If the below job description resonates with you, please proceed to the next page and fill out the job application form. We appreciate your interest and look forward to reviewing your application. Please ensure all information provided is accurate and complete.

#### What You'll Do:

- Collaborate with software/product designers to understand requirements and contribute to the creation of comprehensive test plans.
- Analyze and document extensive test cases based on specified requirements.
- Prepare test scenarios, test scripts, test cases, and test reports.
- Execute various types of testing, including Sanity, Functional, Integration, and Regression testing, to ensure product quality and stability.
- Ensure test coverage for interactions with both SQL (PostgreSQL) and NoSQL (MongoDB) databases, simulating real-world data usage scenarios.
- Automate database testing workflows to streamline validation of data integrity and consistency.
- Perform regression testing to detect defects caused by recent application changes.
- Ensure test execution within the agreed timeline, using tools and techniques specified by the Test/Project Lead.
- Maintain proper documentation of test deliverables, including test cases, RTM, defect reports, and test metrics, ensuring minimal or no review comments.
- Develop automation solutions for both functional and non-functional testing, ensuring scalability and reliability.
- Design, develop, and maintain automated test scripts for web, mobile, and API testing using tools such as Selenium, Cypress, Python, TestNG, and RestAssured.
- Conduct load and performance testing using tools like JMeter, K6, identifying system bottlenecks.
- Continuously enhance automation frameworks to improve efficiency, test coverage, and maintainability.
- Work closely with engineers and project leads to triage and prioritize issues for resolution.
- Mentor and guide junior team members to strengthen the overall capability of the SQA team.

#### Skills & Experiences You'll Need To Have:

- Bachelor's degree in Computer Science or a related field.
- 5+ years of experience in Software Quality Assurance, with a strong understanding of QA methodologies, tools, and processes.
- Hands-on experience in both manual and automated testing.
- Familiarity with Agile and Scrum methodologies is preferred.
- Experience in testing complex data flows involving PostgreSQL, MongoDB, and NoSQL databases.
- Strong knowledge of SQL queries, data analysis, and database testing.
- Ability to work independently and handle complex tasks with minimal supervision.
- Experience in ERP system testing is a plus.
- Familiarity with containerization (Docker) and Kubernetes, with experience testing in cloud platforms, preferably Google Cloud Platform (GCP).
- Proven ability to design and implement test automation frameworks for web, API, and database testing.
- Experience in API testing using tools such as Postman and RestAssured.

• Excellent communication skills for effective collaboration with cross functional teams.

**Job Location:** Gulshan 1, Dhaka, Bangladesh (Onsite)

[Please note: Vacancy is exclusive to Bangladeshi residents]

**We offer you:**

- Competitive salary and benefits package, commensurate with experience and qualifications.
- A positive and collaborative work atmosphere.
- Mentorship by top-tier visionaries in IT, subsequent opportunities for professional growth and career advancement.
- Weekly 2 days holiday along with all govt. and national holidays
- Two festival bonuses.
- Additional benefits according to company guidelines.
