Job Title: Senior QA Automation Engineer

Company Name: Accellor

Share

Description

We are seeking a highly skilled **Senior QA Engineer** specializing in **Automation and Performance Testing** to join our dynamic engineering team. In this role, you will lead efforts to design, implement, and maintain robust test automation frameworks and performance testing strategies. You will collaborate closely with developers, product managers, and other QA engineers to ensure the delivery of high-quality, scalable, and performance software products.

Responsibilities

- Designing, developing, and maintaining scalable and reusable test automation frameworks for UI, API, and integration testing.
- Writing and executing automated test scripts using tools like **Speed Scale, Web driver IO, K6 or Gatling**
- Developing and executing performance testing strategies using tools like J Meter, Speed Scale or Gatling.
- Analyzing performance test results and collaborating with development teams to identify and resolve bottlenecks.
- Leading test efforts by assigning tasks, running status meetings, and participating in sprint planning.
- Collaborating with cross-functional teams to align testing strategies with business goals and ensure high-quality releases.
- Driving improvements in test coverage across unit, functional, and load tests.
- Identifying, tracking, and resolving software defects using tools like Jira or AWS DevOps.
- Mentoring junior QA engineers in best practices for automation and performance testing.
- Staying updated on industry trends and advocating for process improvements to enhance the software development life cycle.

Requirements

- Extensive experience developing test automation frameworks and performance testing strategies.
- Proficiency with automation tools like Web Driver IO, Playwright, Protractor.
- Hands-on experience with performance testing tools like K6, JMeter or Gatling.
- Strong programming skills in languages like, TypeScript, JavaScript
- Knowledge of CI/CD pipelines and experience integrating automation with tools like Jenkins or GitHub Actions.

- Bachelor's degree in Computer Science, Engineering, or a related field (or equivalent experience)

Nice to Have

- Experience scaling large web applications and maintaining high availability services
- Familiarity with microservices architecture and containerization tools like Docker and Kubernetes.
- Knowledge of E-Commerce and subscription systems
- Experience with AWS is desirable
- Knowledge or experience of ECommerce systems, Product Information Management (PIM) solutions
- Working experience with Elasticsearch
- Familiar with third-party backend API integration
- ISTQB or similar QA certifications.
- Experience with Netlify environments

Benefits

Exciting Projects: We focus on industries like High-Tech, communication, media, healthcare, retail and telecom. Our customer list is full of fantastic global brands and leaders who love what we build for them.

Collaborative Environment: You Can expand your skills by collaborating with a diverse team of highly talented people in an open, laidback environment — or even abroad in one of our global centers.

Work-Life Balance: Accellor prioritizes work-life balance, which is why we offer flexible work schedules, opportunities to work from home, and paid time off and holidays.

Professional Development: Our dedicated Learning & Development team regularly organizes Communication skills training, Stress Management program, professional certifications, and technical and soft skill trainings.

Excellent Benefits: We provide our employees with competitive salaries, family medical insurance, Personal Accident Insurance, Periodic health awareness program, extended maternity leave, annual performance bonuses, and referral bonus.
