### Job Title: QA Engineer

### Company Name: The Mill Adventure

Share

### Description

The Mill Adventure is a start-up with the ultimate mission of building awesome products that will change the way the iGaming industry operates. We started our journey in 2019 with the vision of building a technology-driven organization and creating a team consisting of the best specialists in their respective fields.

Today, we provide a complete gaming platform, including licences and operations, for rapid deployment and success in iGaming. Our team of 100+ technology and iGaming experts is guided by passion for invention, operational excellence and commitment to improving the inefficient.

We trust and value our team and we strive to accommodate the right working conditions for each individual, in remote, office based or mixed models. We see the strength in being different and embrace the cultural diversity existing in our group.

As our business continues to grow, we are looking for a QA Engineer to help us build better products, in a smart way.

The QA role plays an important part in our company's product development process and we see the QA Engineer role as an integral part of the development team.

The new joiner will be responsible to design and implement tests, debug and define corrective action, as well as to review system requirements and track quality assurance metrics. Additionally, the person will also monitor all the stages of software development and identify system malfunctions.

The role can be performed remotely.

In this role you will be responsible to:

- Liaise with teams (developers and project managers) to identify system and business requirements
- Review requirements, specifications and technical design document to provide timely and meaningful feedback
- Develop, apply and optimise the testing process for new and existing products
- Create test plans and test cases
- Estimate, prioritise, plan and coordinate the testing activities
- Identify, document, track and document encountered bugs

## Requirements

You'll be a great fit if you have:

- Experience in software development and quality assurance
- Experience in the iGaming industry
- Strong knowledge of software QA methodologies, tools and processes
- Experience in writing test cases and test plans
- Experience with white and black box testing
- Analytical mind with problem-solving aptitude
- Ability to work independently
- Experience with automated testing tools is a plus
- Experience working with AWS stack (or willingness to learn AWS solutions) is a plus
- Knowledge of Javascript, Typescript and the Node.js ecosystem is a plus
- Analytical mind with problem-solving aptitude

## Benefits

- A lean, focused company, offering a flexible working environment
- The opportunity to work with and learn from a highly skilled, talented team
- A great company culture, where accountability is innate, transparency is key and competency is virtue
- Being part of a small, tight knit, caring community
- Laptop and Peripherals budget
- Private health insurance
- Learning budget
- Parking/transport allowance
- Company-wide and team-based get together
