Job Title: Senior QA Engineer

Company Name: Social Discovery Group

Share

Description

- Perform the full testing cycle, from task acceptance to release publication.
- Estimate testing time and ensure compliance with deadlines
- Analyze and test legacy systems with limited documentation.
- Identify, document, and manage bugs, including regression testing.
- Localize defects during early testing stages and analyze logs to identify root causes.
- Collaborate closely with developers, product owners, and other stakeholders.
- Improve and expand existing test coverage for functionality and edge cases.
- Write and maintain test documentation, including requirements for test automation.
- Use GitHub to set up and configure test environments.
- Test APIs using Postman and ensure proper API documentation and validations.
- Work with RabbitMQ to validate message queues and ensure proper communication between services.
- Utilize AWS Console for testing, monitoring, and debugging in cloud environments.
- Validate database queries and troubleshoot data-related issues.
- Use Grafana to monitor and investigate performance and system behavior.
- Support early morning releases, ensuring a smooth deployment process.

Requirements

- Proficiency in Web, Mobile and BackEnd testing.
- Experience testing legacy systems and dealing with incomplete documentation.
- Experience working with loaded systems and multi-project environments.
- Ability to analyze logs and trace issues across distributed systems.

- Familiarity with CI/CD pipelines and version control systems (e.g., Git).
- Proficiency with Postman for API testing and validation.
- Familiarity with RabbitMQ for testing and monitoring message queues.
- Proficiency with Grafana for monitoring and diagnostics.
- Strong working knowledge of GitHub for configuring test environments and managing repositories.
- Strong database skills, including querying and troubleshooting.
- Understanding of microservice architecture and testing approaches for distributed systems.
- Strong analytical and problem-solving skills.
- Working knowledge of AWS Console for testing and debugging cloud-based services will be considered as an advantage.

Benefits

- REMOTE OPPORTUNITY to work full time;
- Vacation 28 calendar days per year;
- 7 wellness days per year that can be used to deal with household issues;
- Bonuses up to \$5000 for recommending successful applicants;
- Full payment for professional training, international conferences and meetings;
- Corporate discount for English lessons;
- Health benefits with up to \$ 1,000 gross per year;
- Reimbursement of workplace costs up to \$ 1000 gross every 3 years;
- Internal gamified gratitude system.
