Job Title: QA Automation Specialist

Company Name: Acolad

Share

Description

Acolad is the global leader in content and language solutions. Its mission is to support companies in every industry to scale across markets and enable growth through cutting-edge technology and localization expertise. Established in 1993, the group is present in 23 countries across Europe, North America, and Asia, with over 1.800 employees supported by a network of +20.000 linguists around the world.

At Acolad, every position is key to our global growth: we know that we will only succeed if our people succeed.

Do you want to join a team that is working at the intersection of code and culture, where technology and global languages meet? If so, Acolad is the place for you.

Our DNA is in the global content lifecycle; our future is in global digital engagement. This means we are the experts in helping brands engage in global conversations with all their users in any language, at any time. All of this requires a cutting-edge production platform, and that is exactly what you will be working on.

You will be working to help users during their day-to-day tasks. You will work with passionate colleagues with a background in machine learning, big data, NLP, localization technology and business process management. Your stakeholders will span the globe, and your end customers will be some of the world's biggest brands.

Are you ready? Join us!

Role:

- Design, develop, and maintain automated test scripts using Playwright for OutSystems applications
- Collaborate with developers and business analysts to understand requirements and create comprehensive test plans
- Identify, document, and track software defects using appropriate tools
- Perform both manual and automated testing of OutSystems applications
- Continuously improve automation frameworks and testing methodologies

Requirements

- Bachelor's degree in Computer Science, Software Engineering, or related field
- 3+ years of experience in software quality assurance and test automation
- Proficiency in Playwright test automation framework
- Experience with JavaScript/TypeScript for test script development
- Familiarity with Agile methodologies and CI/CD practices
- Strong analytical and problem-solving skills
- Excellent communication and teamwork abilities

Preferred Qualifications

- Knowledge of API testing and tools like Postman or SoapUI
- Familiarity with version control systems (e.g., Git)
- Experience with performance testing tools
- Experience in automation in the Outsystems ecosystem

Nice to Have

- Familiarity with Translation Management Systems (e.g. Phrase, XTM, SDL Trados Studio, Translate5)
- Experience with implementation of AI solutions into QA processes

Benefits

- A permanent employment contract with attractive remuneration and numerous additional benefits
- A modern working environment with a great team of motivated colleagues who want to achieve something together
- Interesting development and growth opportunities in a rapidly growing company
- The opportunity to work in our Krakow office or remotely (hybrid model)

Acolad is committed to creating a diverse and equitable workforce. We believe that diversity, equity, and inclusion in all its forms - gender, age, disability, marital status, ethnic or social origin, religion, belief, or sexual orientation - enrich the workplace. It opens opportunities for individuals to express their talents, both individually and collectively, and strengthens our ability to adapt to a changing world. As an equal-opportunity employer, we welcome and consider applications from all qualified candidates, regardless of their backgrounds
