Job Title: Senior QA Automation Engineer

Company Name: Eskimi

Share

ABOUT US

Eskimi is a full-stack programmatic advertising platform capable of reaching 96% of the open web. Our platform allows us to plan, build, and execute high-performing advertising campaigns in over 162 markets. What sets us apart is our commitment to bringing premium creativity to the table in all aspects of our work, and leveraging innovative formats that help us bring the best outcome for advertising agencies and brands all over the world.

How we do things at Eskimi is defined by our strong wish to grow, high sense of ownership, innovation and drive, and collaboration between our teams. With Eskimi team spread across 30+ countries and 5 continents, our global presence creates a dynamic environment, fostering diversity and inclusion.

YOUR TEAM & YOUR MISSION

Eskimi engineering department is a vibrant hub of creativity and innovation. It's a team of curious engineers who navigate the complexities of adtech with persistence and ingenuity. We believe in empowering every team member to contribute unique perspectives. Collaboration is key. Whether brainstorming solutions or refining algorithms, we work together to excel. You will get to explore cutting-edge technologies and methodologies with us - from scalable systems to real-time bidding algorithms, there's always something new to learn. We value camaraderie and support within our team. Join us and be part of something extraordinary.

Eskimi is seeking a QA Automation Engineer to join the team based in Bangladesh and work for our global product.

WHAT YOU'LL DO:

Design, implement and maintain an automated test suite for frontend and backend

Ensure the implementation of automated tests aligned with best practices and standards

Create and keep up-to-date detailed, comprehensive and well-structured test plans and test cases.

Work closely with the development team and give timely feedback on both pre and post-release test results and identified bugs.

Actively share knowledge within the team and stay up to date with the latest news in testing tools and processes.

WHAT WILL HELP YOU DO IT:

4+ years of experience in QA and related areas.

Experience working with automation tools and frameworks for UI, REST API testing, Cypress or Selenium will be considered as a plus

Good understanding of at least one OOP language, preferable Python, JS

Experience setting up testing frameworks

Working experience of Jenkins (or another CI)

Awareness of performance, scalability, maintainability and security

Being comfortable with setbacks, and willing to learn from them

Hunger to learn, grow and level up

Excellent written, spoken level of English.

WHAT'S IN IT FOR YOU:

Flexible work arrangements, including hybrid work models in cities with physical offices and remote work options everywhere else. Where we work in a hybrid model, our team members can use Work Away Days, allowing them to work fully remotely for up to 1 month per year. We also have flexible working hours, with most Eskimians starting the day at 9 am in their local time zones.

leading to full-time roles within the team.

We have a recognition culture that celebrates achievements. We value everyone's contribution to bringing the best talent and new clients to Eskimi, and we offer Bonus systems to encourage this. The Bonusly recognition system also highlights accomplishments, allowing team members to share recognition points redeemable for various gifts and vouchers.

Additional perks include private health insurance (location-dependent), volunteer days, and organized online and in-person get-togethers in office locations to foster meaningful connections among team members.

JOIN US!

Be a part of a fast-growing AdTech company and work with products that change the landscape of digital advertising around the globe. Let's grow together! With us - not even the sky's the limit. Apply or reach out to muktadir@eskimi.com and let's chat.
