Job Title: Software Tester

Company Name: Venchr

Share

About the job

Manual QA (Software Tester) - ClimateTech (Carbon Accounting) - Remote - Start-Up - English Speaking

Venchr is delighted to have partnered with a market-leading SaaS startup specializing in compliance solutions for CBAM - they are at the forefront of innovation, offering cutting-edge technology that helps businesses navigate complex regulatory landscapes.

The main aim is to establish itself as the global software backbone that provides the seamless operation of freshly imposed financial carbon border taxes, overcoming a significant barrier that pushes us ever closer to the decarbonization of global heavy carbon-emitting industries.

We are currently seeking a Manual QA individual to join our dynamic & young team. As a QA Software Tester, you will play a crucial role in the manual testing of our cutting-edge software.

Requirements:

- Information technology background – 1-2 years spent in ideally SaaS-oriented Software Development teams. That can be as a manual tester, junior technical PM/PO, technical support or so.
- Detail-oriented, proactive, communicative, collaborative attitude.
- Ability to provide clear, actionable feedback, i.e. clear and to-the-point interactions.
- Some past experience in sw development team workflows, including working with lightweight PM tools Jira, Confluence, Notion.
- Basic understanding of modern sw stack (backend, frontend, API, deployment, staging etc.) is needed.
- Good sense to distinguish business priorities from nitpicking.
- Good intuition for data and anomalies.

- Experience with some kind of test automation framework is a bonus.

This is a mission to decarbonize as much of our client's supply chains across the globe as possible. We aim to have an incredible impact on driving down the biggest carbon-emitter supply chains.

Venchr is an equal opportunity employer. We do not discriminate based on age, disability, gender reassignment, marriage and civil partnership, pregnancy, race, religion or belief, sex, or sexual orientation. All applicants will receive consideration for employment based on their talent, skillset, and individual merit alone.
