Job Title: Technical Lead, Software Quality

Company Name: BRAC IT SERVICES LTD.

Share   

BRAC IT Services Limited is an innovative IT company dedicated to excellence and quick expansion. We presently have openings on our team for bright individuals and offer exciting career prospects in various positions. To develop top-notch, scalable software solutions, BRAC IT promotes an environment of invention and teamwork. Come help us shape the direction of global IT services and technology.

If the below job description resonates with you, please proceed to the next page and fill out the job application form. We appreciate your interest and look forward to reviewing your application. Please ensure all information provided is accurate and complete.

What you'll do:

- Lead the planning, design, and execution of manual and automated test strategies.
- Drive the software quality assurance lifecycle within the Agile process.
- Establish and coordinate test strategies with development/product teams.
- Maintain high-quality standards through effective test coverage and documentation.
- Implement scalable test automation frameworks and drive automation strategy.
- Lead load and stress testing initiatives, identifying system bottlenecks.
- Use monitoring tools to track application performance and identify improvement areas.
- Ensure tests cover interactions with both SQL (Postgres) and NoSQL (MongoDB) databases, simulating real-world data usage scenarios.
- Ensure security testing aligns with best practices, utilizing tools such as OWASP/ZAP to identify vulnerabilities.
- Utilize CI/CD pipelines for continuous testing and integration.
- Manage meetings, set goals, provide feedback on testing tasks, and delegate testing responsibilities.
- Ensure adherence to SQA best practices and processes across all projects.
- Collaborate with cross-functional teams to understand requirements and ensure alignment on quality goals.
- Mentor and guide team members in technical and process-related areas, promote best practices and support professional growth.

Skills & Experiences You'll Need To Have:

- Bachelor's degree in Computer Science or related field.
- 10+ years of experience in SQA, with at least 5 years in a leadership role.
- Strong understanding of SDLC, STLC, and agile methodologies.
- Ability to multi-task, proactive in project planning and requirements gathering.
- Excellent problem-solving skills, attention to detail, and a focus on delivering high-quality products.
- Effective communication skills, with the ability to collaborate across technical and non-technical teams.
- Proficiency in test automation tools (e.g., Selenium, RestAssured), scripting languages (e.g., Java, Python).
- Experience with cloud platforms (e.g., Google Cloud Platform (GCP)), Kubernetes, and testing cloud-native applications.
- Experience with Security testing, and monitoring tools (e.g., Grafana, New Relic).
- Expertise in load testing (e.g., JMeter, K6).
- Experience automating tests for microservices architectures, including interaction with event-driven systems like Kafka and RabbitMQ.
- Strong understanding of CI/CD pipelines (e.g., Jenkins, CircleCI, GitLab CI) and integrating test automation within these workflows.
- Proven experience with testing complex data flows involving Postgres, MongoDB, and NoSQL databases.
- Knowledge of CQRS and event sourcing principles and their impact on testing strategies.

[Please Note: vacancy is exclusive to Bangladesh residents]

We offer you:

- Competitive salary and benefits package, commensurate with experience and qualifications.
- A positive and collaborative work atmosphere.
- Mentorship by top-tier visionaries in IT, subsequent opportunities for professional growth and career advancement.
- Weekly 2 days of holiday along with all govt. and national holidays
- Two festival bonuses.
- Additional benefits according to company guidelines.
