### Job Title: QA Engineer

### Company Name: Broadway Gaming

Share   

#### Description

Broadway Gaming is a dynamic and expanding online gaming company operating mainly in the UK gaming market. We offer Bingo, Casino and Slot products across multiple brands. We have office locations in Dublin, London, Tel Aviv, Romania and India.

With a wide variety of backgrounds comes a wealth of experience, ideas and personalities and we use these to help us create a great service and a great place to work and learn. Because collaboration is fun and benefits us all and ultimately it benefits our customers!

We are looking for a QA Engineer to join our Product team. As a QA Engineer, you'll be responsible for ensuring the quality of our system's quality and facilitating agile processes and ceremonies. You'll work closely with the development team to identify, report, and track issues, as well as collaborate with other Scrum team members to ensure timely resolution. You will have the opportunity to serve as a Scrum Master, helping the team to implement agile processes, improve efficiency and develop management skills.

This role requires an understanding of testing methodologies and the ability to work independently in a fast-paced environment.

#### Responsibilities

- Manual testing: Web and Mobile (native).
- Estimation of testing efforts for the project.
- API Testing.
- Provide clear and accurate reporting on testing progress and results.
- Design and execute test plans and cases to ensure product quality.
- Mentor other QA team members.
- Collaborate with cross-functional teams to identify and prioritize defects and provide feedback on usability, functionality, and performance.
- Analyze automated test results.
- Perform investigative testing to determine possible causes of issues.
- Ensure that the software meets both functional and non-functional requirements.
- Communicate quality status to stakeholders and management.

#### Requirements

- \*\*2+\*\* years of commercial experience in software testing.

- Understanding of client-server architecture and microservices.
- Experience with CI/CD processes and tools.
- Excellent analytical and problem-solving skills.
- Must be passion for being QA advocate to raise the bar for better quality gates
- Strong attention to detail and ability to work in a fast-paced environment.
- Excellent written and verbal communication skills.
- Strong understanding of QA Processes.
- Self-motivated, fast learner, and good level of analytical and troubleshooting skills are a must
- Ability to multi-task, prioritize, and be able to work on your initiative
- Experience working in an Agile/Scrum development process.
- English Upper Intermediate (\*\*spoken is a must\*\*).
- Hands-on experience with SQL and experience in querying databases is a must
- Possession of Foundation ISTQB certification is nice to have

### Benefits

- Hybrid work-from-home model.
- Competitive Salary (DOE).
- Discretionary Annual Performance Bonus.
- Company-funded health insurance.
- Personal life insurance and Income protection.
- Education allowance.
- Tax Saver Scheme.
- Bike to Work.
- Inclusive policies - maternity, paternity.
- Company Social events, pool tournaments, and much more fun.
- City Centre Location.
