Job Title: Senior Quality Assurance Engineer - Web

Company Name: Speechify

Share

Mission

Speechify is the easiest way to listen to the world's information. Articles on the web, documents in the cloud, books on your phone. We absorb it all and let you listen to it at your desk, on the go, at your own speed, and with tools that make learning easier, deeper, and faster. What streaming services have done for audio entertainment, we're doing for audio information. And whatever we're doing seems to be working. We're #1 in our category, and experiencing exponential growth.

Overview

Our team is committed to changing the way people read and with our exponential growth, we are looking for a strong QA engineer to help us succeed through testing mobile applications. We love a commitment to quality and risk assessment, maintaining documentation, and curiosity of testing trends and industry standards.

This is a full-time remote role and can be based anywhere globally.

What You'll Do

- Develop and execute test plans, test cases, and test scripts for the Speechify iOS app, ensuring comprehensive coverage for both manual and automated testing.
- Collaborate with the development team to identify, reproduce, and document issues and defects in the iOS app.
- Utilize and maintain automation tools and frameworks for Web, such as Playwright, to increase efficiency and reduce manual testing efforts.
- Stay up-to-date with the latest industry trends, tools, and best practices in Web testing and automation.
- Create and maintain test documentation, including test plans, test cases, and test summaries, ensuring they are clear, concise, and up-to-date.
- Communicate testing results, progress, and issues to project stakeholders, including developers, product managers, and customer support teams.
- Participate in agile development processes, attending daily stand-ups, sprint planning sessions, and retrospectives.
- Continuously identify opportunities for process and tool improvements, and work with the team to implement these enhancements.

An ideal candidate should have

language

- Experience with continuous integration and continuous delivery (CI/CD) pipelines, such as Bitrise, CircleCI.
- Solid understanding of Agile methodologies and experience working in an Agile environment.
- Excellent troubleshooting and problem-solving skills, with the ability to identify, analyze, and resolve issues in a timely manner.
- Strong communication and collaboration skills, with the ability to work effectively with cross-functional teams.
- Experience with version control systems, such as Git.

Nice-to-Have:

- Experience with text-to-speech technologies.
- Familiarity with accessibility testing and guidelines, such as WCAG.

What we offer

- A fast-growing environment where you can help shape the company and product.
- An entrepreneurial-minded team that supports risk, intuition, and hustle.
- A hands-off management approach so you can focus and do your best work.
- An opportunity to make a big impact in a transformative industry.
- Competitive salaries, a friendly and laid-back atmosphere, and a commitment to building a great asynchronous culture.
- Opportunity to work on a life-changing product that millions of people use.
- Build products that directly impact and support people with learning differences like dyslexia, ADD, low vision, concussions, autism, and more.
- Work in one of the fastest growing sectors of tech, the intersection of artificial intelligence and audio.

Think you're a good fit for this job?
