Job Title: Senior QA Automation

Company Name: Yopeso Romania SRL

Share   

Yopeso has developed a diverse range of software products, from large-scale applications to smaller solutions, for 19 years. With a growing team of over 250 employees across five locations, we are dedicated to fostering a culture of growth, transparency, and professionalism. At Yopeso, we value authenticity, curiosity, and ambition. These values drive us to build strong connections within our community and with our partners, ensuring trust, integrity, and transparency in all our business practices. We strive to maintain the highest professional standards and continuously challenge ourselves to develop high-quality, high-performance, secure software solutions.

Our approach is rooted in efficient collaboration among passionate professionals in agile teams. Guided by curiosity and ambition, we strive to create products that are meaningful and impactful, while remaining true to our authentic selves.

What we offer:

- Competitive remuneration
- Remote work
- 24 days off per year and floating days
- Private clinic health services Regina Maria Medical Insurance
- Flexible benefits through Up multi benefits platform
- Referral bonus scheme
- Team events, online or at the office
- Training and development opportunities with allocated budget
- Professional Certifications
- Knowledge sharing context

Key Responsibilities:

- Quality Assurance: Collaborate with product owners and stakeholders to ensure applications meet the highest quality standards and align with business objectives.
- Issue Identification & Resolution: Proactively identify and resolve data quality issues and application setup problems to prevent disruptions in the user experience.
- Service & Toolchain Integrity: Address gaps in the implementation of various services and processes across the entire toolchain to improve system reliability and overall performance.
- Test Strategy & Implementation: Work independently or with the team to define comprehensive test strategies for new features, ensuring they are fully tested across all scenarios.

software defects, troubleshoot them, and contribute to their swift resolution.

- **Production Issue Resolution:** Troubleshoot and assist with resolving issues in the production environment to ensure minimal downtime and optimal performance.
- **Mentorship & Leadership:** Guide and mentor junior QA engineers, promoting best practices and fostering a culture of continuous improvement.

Technical Skills:

- **Test Automation Tools:** Proficiency in using tools such as Selenium, Appium, Cypress, and others to automate tests across web and mobile platforms.
- **Programming Languages:** Strong knowledge of programming languages like Java, JavaScript, or C#.
- **CI/CD & Version Control:** Familiarity with CI/CD tools (Jenkins, GitLab CI, Github Actions etc.) and version control systems (Git).
- **API Testing:** Hands-on experience with API testing tools such as Postman, RestAssured, and Axios.
- **Performance Testing:** Familiarity with performance testing tools like JMeter or LoadRunner.
- **Browser Debugging Tools:** Expertise in-browser tools for debugging web applications and resolving issues.
- **Agile Experience:** Comfortable working in Agile methodologies (Scrum/Kanban) and participating in sprint planning and retrospectives.
- **Cross-Functional Collaboration:** Experience working with international and cross-functional teams to drive quality initiatives and achieve project goals.

Experience & Qualifications:

- **Professional Experience:** Minimum of 5 years of hands-on experience in QA automation testing, with a strong background in both web and desktop application testing.
- **Business Understanding:** Ability to translate business requirements into functional features, and further break them down into detailed test scenarios and test cases.
- **Attention to Detail:** Exceptional focus on detail to identify edge cases and ensure all aspects of the application are thoroughly tested.
- **Problem-Solving:** Strong troubleshooting skills with a methodical approach to resolving issues.
- **Software Architecture:** A good understanding of software architecture, modular frameworks, and system integration.
- **Test Data Preparation:** Ability to understand complex data models and prepare appropriate test data and application setups for testing.
- **Communication Skills:** Fluent in written and verbal English, with experience communicating across international teams.

Nice to have:

applications.

- Containerization: Familiarity with Docker and containerized environments for testing purposes.
- Cloud Services: Experience with cloud-based platforms such as AWS, Azure, or GCP.
