Company Name: ReliSource

Share   

Application Deadline

January 31, 2025 (Early applications will be given preference)

Job Location

Gulshan-1, Dhaka

Number of Vacancies: 3

Who are we looking for?

We are looking for dynamic individuals having the following qualities:

Educational Requirements

Bachelor of Engineering in Computer Science or Equivalent, (B. Tech) in CS, IT or ECE or equivalent.

Experience Requirements

Minimum five (5) years of industry experience.

Overview of the Responsibilities

- Develop and execute comprehensive test plans and test cases in an Agile Scrum Framework.
- Design, develop, and maintain automated test suites for the front-end / backend application.
- Conduct regression testing and install/upgrade testing during the regression phase.
- Analyze test failures to identify root causes and collaborate with the development team for resolution.
- Interact with product teams and stakeholders to understand testing requirements, provide updates, and highlight issues.
- Apply domain, system, and process knowledge to establish QA processes that ensure high standards throughout the software development lifecycle.
- Create project estimates and contribute to the design of new product functionality.
- Identify and discuss challenges, risks, and mitigation plans with managers and technical leads.
- Participate actively in Agile Scrum meetings, including refinement and planning sessions.
- Mentor and guide junior QA engineers, promoting continuous improvement and professional development.

Key Requirements

- Minimum five (5) years of industry experience in software quality assurance.
- Hands on knowledge building framework by using opensource such as Selenium/WebdriverIO and Java/JavaScript or Python.
- Hands on knowledge of Microservices component and integration testing. Working proficiency on tools such as Postman or any other suitable opensource API testing tool.
- Practical knowledge on implementing BDD approaches inside an Agile environment.
- Proficiency in writing noSQL, SQL queries and understanding database management specially the RDMS.
- Experience with test and defect/project management tools such as Jira, and Azure DevOps.
- Excellent problem-solving skills and attention to detail.
- Strong programming, debugging, and troubleshooting skills.
- Ability to function effectively in a high-pressure and demanding environment.
- Excellent communication and collaboration skills, with the ability to work independently and as part of a team.

Nice To Have Requirements

- Certification in relevant QA methodologies or tools is a plus.
- Familiarity with DevOps practices and continuous integration/continuous deployment (CI/CD) pipelines.

What's in it for you?

1. Very competitive salary and long-term benefits with excellent career opportunity in a focused & stable organization.
2. Great opportunity to work with global companies.
3. A healthy work environment with opportunity to learn from a number of highly skilled engineers.
4. Weekend: Saturday and Sunday.

How would you apply?

If you believe you are the right candidate, then send your CV to career@relisource.com with the exact subject line "SSQA_30062024" by **January 31, 2025**.

IMPORTANT: Resume attached without above subject line will not be processed. Your CV must include your photograph.
