### Job Title: Senior QA Engineer (Manual + Automation)

Company Name: Halo

Share

#### Description

Halo believes in **innovation by inclusion** to solve digital problems. As an international agency of over 300 people specializing in interactive media strategy and development, we embrace equity and empowerment in a serious way. Our interdisciplinary teams of unique designers, developers and entrepreneurial minds with a variety of backgrounds, viewpoints, and skills connect to solve business challenges of every shape and size. We empathize to form **deep, meaningful relationships** with our clients, so they can do the same with their audience. Working at Halo feels like belonging. Learn more about our philosophy, benefits, and team at <https://halopowered.com/>

We are seeking a **Sr. QA Engineer (Manual + Automation)** to support the delivery of end-to-end applications, by continuously improving the quality of the products to meet our engineering excellence standards. To be successful in this role, you should have a proven track record of working experience in manual & automation testing in a fast-paced environment focused on continuous improvement.

#### Requirements

- Work experience in manual testing for web-based and hybrid applications.
- Good understanding of the improvement process for Manual Testing (Smoke, Regression, QA SignOff, GO / NO GO, End-to-End, User Acceptance Testing).
- Solid comprehension of Agile methodologies.
- Previous experience in designing and executing test cases, analysis of requirements, and acceptance criteria.
- Analytical mindset to identify test scenarios for both Front-end and Back-end.
- Collaborate on the Software Development Life Cycle, analyzing test results, errors, and bugs.

#### Responsibilities

- Participate in the full life-cycle of software development from requirements through implementation.
- Elaborate reports on the effectiveness and defects to the production team.
- Join forces with Test Automation Engineers, Business Analysts, Delivery Managers, Technical Leaders, and Software Developers.
- Work in an agile environment with a multicultural team.
- Understand test strategies and assess risks.

#### Benefits
