Job Title: Associate Quality Assurance Engineer

Company Name: New Web Order

Share

About the job

Associate QA Engineer

We're seeking a detail-oriented Associate QA Engineer to join our dynamic engineering team and help ensure the highest quality of our software products. In this role, you'll work closely with developers, product managers, and fellow QA engineers to build and maintain robust automated testing frameworks.

Core Responsibilities

As an Associate QA Engineer, you'll drive quality through automation and collaboration. Your key responsibilities will include:

- Designing and implementing end-to-end automated tests using Playwright to ensure comprehensive coverage across our web applications
- Building and maintaining CI/CD pipelines using GitHub Actions to enable continuous testing and deployment
- Collaborating with the development team to implement testing strategies early in the development lifecycle
- Troubleshooting test failures and providing detailed bug reports with clear reproduction steps
- Contributing to test infrastructure improvements and testing framework development
- Participating in code reviews and providing constructive feedback on testability

Technical Requirements

- Experience with modern test automation frameworks, particularly Playwright for end-to-end testing
- Working knowledge of CI/CD concepts and hands-on experience with GitHub Actions
- Basic understanding of DevOps practices and principles
- Familiarity with version control using Git and GitHub
- Knowledge of JavaScript/TypeScript for test automation
- Understanding of software testing methodologies and best practices

- Demonstrates strong analytical and problem-solving skills
- Shows initiative in learning new technologies and methodologies
- Communicates effectively with technical and non-technical team members
- Values collaboration and takes ownership of their work

Growth Opportunities

- Mentorship from senior QA engineers and developers
- Exposure to modern testing practices and tools
- Opportunity to shape the testing strategy for new features and products
- Professional development through conferences, workshops, and training

Join our team and help build the foundation for exceptional software quality while growing your career in test automation and DevOps practices.
