Job Title: QA ENGINEER

Company Name: JustGo

Share

Overview

JustGo (justgo.com) is a fast-growing cloud-based software provider delivering solutions to National Governing Bodies of Sport and other membership-led organizations. JustGo has built an enviable customer base of leading sporting organizations and is looking to scale the solution worldwide.

We have an exciting opportunity for a QA Engineer who is experienced in Functional and Automation Testing. The Quality Engineer will work closely with Project Management, Quality Assurance, and Development teams on multiple, multi-faceted projects from creation to completion. They will conduct highly complex quality assurance tests and analyses to ensure that the software meets or exceeds specified standards and end-user requirements. They will perform technical and/or in-depth advanced development and execution of test cases, and coordinate with and work within a team of quality engineers.

You will work with a hugely diverse range of sports organizations that are looking to transform their digital landscape. You will help them overcome challenges and deliver truly leading-edge, flexible, fit-for-purpose membership and event management solutions.

What you will do:

- Work with the product team to understand requirements, design comprehensive test plans and test cases.
- Develop and execute test cases and test plans to validate software functionality and performance.
- Create automated tests for the test cases, and manually test software for which automation is not available yet.
- Collaborate with developers to reproduce and troubleshoot reported issues.
- Conduct functional, regression, performance, and user acceptance testing to identify and report defects, ensuring timely bug resolution.
- Perform root cause analysis to identify and address the underlying causes of defects and quality issues.
- Establish and track quality assurance metrics and report to the management
- Evaluate and apply open source or commercial test tools
- Collaborate with DevOps teams to integrate testing activities into the CI/CD pipelines, enabling continuous testing and deployment.
- Develop quality assurance standards and company processes.

- You are highly technical and curious.
- You have excellent English skills – both spoken and written.
- You hold a Bachelor's degree in Computer Science or a related field.
- You have at least 2 years of QA and testing experience.
- You have experience with Cypress, Selenium, or other similar automation tools (an added advantage).
- You are familiar with Agile methodology and the Scrum framework.
- You have experience with test design techniques.
- You can write and maintain test cases and review requirements and test cases.
- You have experience with version control systems (e.g., Git) and CI/CD tools.
- You have a clear understanding of SQL queries.
- You have performance or security testing experience (an added advantage).
- You possess strong analytical, decision-making, and problem-solving skills.
- You are passionate about testing and continuous improvement and strive to keep things as simple as possible.

Benefits To You

- Salary – 40-60K BDT (Monthly)
- 30 days yearly leave (25 days casual and 5 days sick leave)
- Hybrid working environment (2 days from home, 3 days from office)
- All necessary equipment will be provided
- Food allowance
- 2 day weekends
- Fun and international work environment with a friendly group of people
- 6-month probation period after joining

About JustGo

JustGo provides a complete membership management system and online membership experience for National Governing Bodies and Sports Clubs globally. The platform supports membership, event ticketing, communications, qualification management, reporting, safeguarding, member engagement and lots more. JustGo is trusted by over 100 national sporting bodies worldwide, with customers including British Gymnastics, AusTriathlon, Canadian Kendo Federation, Special Olympics Ireland, Badminton England, Swim Wales and United States Twirling Association.
