Job Title: QA Automation Engineer

Company Name: PRODYNA

Share

Description

About the Role:

We are seeking a skilled **QA Automation Engineer** with expertise in modern testing frameworks to join our growing team. The ideal candidate will have hands-on experience with **end-to-end (E2E) testing using Playwright and TypeScript** as well as **Selenium/Cucumber** for behavior-driven development (BDD). If you're passionate about building high-quality, scalable test automation solutions and have a keen eye for detail, this role is for you

Key Responsibilities:

- Design, develop, and maintain E2E automated test scripts using **Playwright** and **TypeScript**.
- Create and manage automation frameworks using **Selenium** integrated with **Cucumber** for BDD.
- Collaborate closely with developers, product managers, and other QA engineers to define test strategies and ensure product quality.
- Write, maintain, and execute test cases across various browsers and platforms, ensuring optimal test coverage.
- Investigate and report bugs, ensuring issues are documented clearly and followed up to resolution.
- Optimize existing testing frameworks, improving performance, scalability, and ease of use.
- Ensure tests are integrated into continuous integration (CI) pipelines and regularly run in various environments.

Nice to Have:

- Experience with **mobile app testing** (iOS/Android), particularly using tools like **Appium** or other mobile testing frameworks.
- Familiarity with other modern testing frameworks and tools such as **Cypress**.
- Experience in performance testing

Requirements

Required Skills & Qualifications:

- Strong experience with **Playwright** and **TypeScript** for E2E test automation.
- Hands-on experience with **Selenium** and **Cucumber** in a BDD environment.

- Experience with version control systems such as **Git**.
- Strong problem-solving skills and attention to detail.
- Excellent communication skills and the ability to work collaboratively in a team environment.

Nice to Have Skills:

- Experience with **mobile testing** frameworks like **Appium** or native testing tools for Android/iOS.
- Knowledge of test management tools like **TestRail**, **Jira**, or similar platforms.
- Familiarity with performance and load testing tools (e.g., **JMeter**, **LoadRunner**).
- Knowledge of cloud platforms for testing (e.g., **BrowserStack**, **Sauce Labs**).

Benefits

Compensation & Perks

- Salary: We will settle on the exact compensation amount based on prior experience and skills.
- Private health insurance & Life Insurance from day #1
- Health management scheme (weekly sessions & monthly challenges)
- 25 vacation days
- Team events tech oriented and more
- International network
- Lunch in the office
- Employee referral programme/ bonus

Dedicated budget for:

- Employee education ~ 800€
- Hardware selection (MacBook or Lenovo ThinkPad) with your mobile ~ 3000€
