Job Description

Senior QA Automation Engineer (.NET)

Location - Bangalore

Experience - 4 to 6 Years

We are seeking an experienced QA Automation Engineer with 4 to 6 years of hands-on experience in automated testing of .NET applications. The ideal candidate will have a strong background in developing robust test automation frameworks and implementing comprehensive test strategies for complex enterprise applications.

Key Responsibilities

- Design and develop advanced test automation frameworks using C# and .NET
- Create and maintain automated test suites for web, desktop, and API testing
- Lead test strategy development and implementation for complex projects
- Perform thorough regression testing and analyze test results
- Identify and document software defects with detailed reproduction steps
- Collaborate with developers to improve application testability
- Mentor junior QA engineers on automation best practices
- Participate in code reviews of test automation scripts
- Drive continuous improvement in testing processes and tools

Required Technical Skills

- 4-6 years of QA automation experience with .NET applications
- Strong proficiency in C# and .NET testing frameworks
- Expert knowledge of Selenium WebDriver with C#
- Experience with API testing tools (Postman, RestSharp)
- Proficiency in test automation frameworks:

- Playwright for modern web testing
- Strong experience with CI/CD tools (Azure DevOps, Jenkins)
- Expertise in API testing and web services (REST, SOAP)
- Proficiency in SQL for test data management
- Experience with version control systems (Git)

Additional Technical Requirements

- Understanding of test automation design patterns
- Experience with performance testing tools (JMeter/K6)
- Knowledge of mobile testing frameworks
- Familiarity with containerization (Docker)
- Experience with cloud testing (Azure/AWS)
- Understanding of security testing principles
