Job Title: Automation QA Engineer (Unity)

Company Name: Homa

Share

Description

Welcome to Homa, the gaming technology lab that is taking the industry by storm! Our team of over 230 people, hailing from more than 35 different countries, is dedicated to empowering mobile game creators worldwide to bring their creative ideas to the top charts.

Our Homa Lab platform offers a comprehensive suite of cutting-edge tools that allow developers to stay on top of the latest trends, test new features in real-time, and easily distribute and monetize their games. Our success speaks for itself - our apps have been downloaded 1.8 billion times!

Since our inception, we have raised \$165 million in total from prominent investors, including Headline, Northzone, Eurazeo, Singular, Quadrille Capital, Fabric Ventures, and Bpifrance. We have also received support from renowned business angels, such as the founders of King, Sorare, and Spotify. But what truly sets Homa apart is our team. We are a diverse group of individuals from different backgrounds, countries, and cultures, all driven by a shared passion for taking over the gaming industry. Our team is rapidly growing, attracting industry veterans eager to help us deliver the next generation of Homa's games. Joining Homa means becoming part of a dedicated team creating innovative and high-performing games for players worldwide. If you're ready to take your career to the next level and make a real impact in the gaming industry, then Homa is the perfect place for you. Join us and let's create the future of gaming together!

Role & missions – What you will do 🚀

Join our dynamic team as an Automation QA Engineer specializing in mobile hypercasual gaming. As the key contributor to our quality assurance efforts, you will be responsible for designing, implementing, and maintaining automated testing solutions for Unity-based hypercasual games on mobile platforms. If you have a strong background in Unity game development, expertise in mobile testing, and a passion for creating seamless gaming experiences, we want you on our team!

You will be in charge of:

Mobile Automation Development:

Collaborate with game developers and QA team members to identify and automate critical mobile game functionality.

Test Framework Optimisation:

Enhance and optimise existing test frameworks for Unity games on mobile, ensuring compatibility and scalability.

Stay updated with the latest tools and techniques in mobile automation to improve efficiency and effectiveness.

Device Compatibility Testing:

Conduct rigorous testing across a variety of mobile devices to ensure optimal performance and compatibility.

Troubleshoot and address device-specific issues that may arise during testing.

Continuous Integration for Mobile:

Implement and maintain automated build and deployment processes specifically tailored for mobile platforms.

Integrate automated tests into the mobile development pipeline to support rapid and reliable releases.

User Experience Testing:

Collaborate with UX designers to ensure a seamless and enjoyable user experience on mobile devices.

Conduct usability and performance testing to identify and address potential user interface and experience issues.

Requirements

Preferred Experience—What's your profile 🧐

Proven experience in Unity game development and QA automation, particularly for mobile hypercasual games.

Experience in using games automation tools like AltTester, Airtest, Unium, or AutoHotKey

Strong proficiency in Unity mobile testing.

Experience in scripting using C# with a focus on mobile platforms (iOS and Android).

Demonstrable experience & success with mobile automation tools and frameworks, such as Alt Tester, Airtest, Firebase or Appium.

At Homa, we are building a community of brilliant talents. We believe that true innovation comes from diversity and collaboration, and that's why we prioritize brainpower and determination over formal education. So if you have the talent, energy and motivation, there is no obstacle to your success here.

As the creative experts behind the platform, we provide developers with the data they need to bring their ideas to life. Our team lives by three central values that guide everything we do:

💡 **Ambition:** we're not afraid to tackle difficult challenges and set our goals extremely high. We're on a mission to revolutionize an industry dominated by well-established companies, and we won't stop until we succeed.

💡 **Humility:** we leave our pride & ego aside. We are always ready to lend a helping hand, celebrate each other's successes, and learn from our failures. As Mr. Lamar said, "Sit down. Be humble."

💡 **Curiosity:** we keep our minds open and never stop learning. We believe that questioning everything is the best way to stay ahead of the curve, and we encourage all our team members to stay curious and never stop exploring new ideas.

At Homa, you'll be challenged, supported, and inspired every day, and we can't wait to see what you bring to the table.

Benefits

Perks & Benefits 🎁

While success is its own reward, here are some of the benefits that come with working at Homa:

We offer essential benefits in France and specific locations, including health insurance, meal vouchers, public transport subsidies, childcare benefits, and life insurance

If you're interested in working from our newly renovated Paris HQ with a rooftop garden and WeWork amenities, we have a desk waiting for you

You will be working in English with our international team of top-tier talents from 35+ countries

You will be able to attend diverse team events and Workations (the famous company-wide Homa trip)

You will have bi-annual reviews with your manager to reflect on your performance, celebrate wins, and receive constructive feedback
