**Job Title: QA Automation Engineer**

**Company Name: Brain Station 23**

Share

### Company Description

It was in 2006, with little capital but a pocketful of belief our CEO, Raisul Kabir started Brain Station 23, a software company, right after graduating from BUET. The new company initially focused on the international market with the local market added in 2010. Since then the company has shown a continuous growth and currently employs over 600+ software engineers. Brain Station 23 is now not only an established name in Bangladesh but also in countries like the USA, UK, Netherlands, Denmark, Japan, Norway, Sweden, Germany, Canada, Switzerland, Turkey and the Middle East etc.

### Description

We are looking for some SQA Engineer, who is responsible for planning and preparing test automation scripts for mobile. Examining products to determine the quality and engaging with customers and gathering product feedback, among other duties. Therefore, a strong understanding of agile processes and the related QA lifecycle and automation methodology are necessary as well.

### Job Responsibility:

Analyze user stories, use cases, and acceptance criteria and develop or update test cases, and test suites.

Build test script for mobile automation.

Executing new test cases to verify and validate user stories that are satisfying acceptance criteria.

Thorough understanding of SDLC, specifically automated QA processes in agile development environments

Log defects, work with development to resolve and verify fixes when implemented.

Participate in the identification and implementation of continuous improvement in our process and standards for the entire team.

Minimum 2 years of relevant experience in SDLC/UAT type testing.

Strong programming skills Java, Python and understanding of test frameworks.

Experience with Mobile Automation with real devices and cloud platform.

Exposure to generic test automation frameworks for acceptance testing and acceptance test-driven development, e.g. Webdriver IO, Cypress, Selenium.

Experience testing complex web applications and APIs.

Must be detail oriented with excellent analytical skills.

Experience with QA and Agile/Scrum development process.

Experience with API testing like Postman.

Experience in automation using cucumber BDD framework with selenium, Appium.

Experience with Mobile automation tests run on Browser Stack.

Experience with parallel tests run on Browser Stack

Basic Knowledge in SQL Server 2018/2019 with SSMS will be a plus

Experiences in CI/CD tools like Docker and Jenkins.

Exposure to common CI/CD tooling is a plus.

Confident using Git.

Experience with standard test cases and defect management tools like Jira, Testrail.

Contribute to ongoing test automation development.

Cross-browser testing.

Ability to work individually and independently with minimal supervision.

Highly motivated and confident enough in team leading.

Strong written and verbal communication skills in English.

Strong communication skills, oral and written.

Educational Requirements:

B.Sc./M.Sc in Computer Science or Software Engineering from any reputed university/Equivalent combination of education and experience may be considered.

Attractive Salary for deserving candidates
