Job Description:

We are looking for a dynamic and detail-oriented Software Quality Assurance Engineer to join our team. If you have a keen eye for bugs and love diving deep into code, this could be the perfect role for you!

Job Responsibilities:

- Assist in the planning and execution of software testing activities.
- Write and execute test cases, including manual and automated tests.
- Identify, document, and report bugs and issues in a clear, concise manner.
- Collaborate with developers, product managers, and other team members to ensure timely issue resolution.
- Support testing across various platforms (web, mobile, API).
- Learn and apply testing frameworks, tools, and methodologies.
- Provide feedback and suggestions to improve software quality and user experience.

Job Requirements:

- Basic understanding of software testing concepts, including test cases, test plans, and bug tracking.
- Familiarity with any programming language (e.g., Python, Java, JavaScript).
- Experience with any testing tools (e.g., Selenium, JUnit, Postman).
- Familiarity with Agile or Scrum methodologies.
- Knowledge of automation testing and CI/CD tools.

You will be a vital part of a dynamic team to help you achieve your goal as this position is goal-oriented.

Excellent command of English is a must.
