##### Responsibilities & Context

You can work in a Japanese-based multinational company with 100 talented employees. You may have the opportunity to communicate with Japanese, Indian, and other foreigners.

You will work on in-house projects related to online travel agencies.

Adventure Dhaka Limited, a subsidiary of a Japanese company, Adventure Inc. (One of the leading publicly listed OTAs in Japan), is looking for a technically sound Sr. SQA Engineer based in Dhaka, Bangladesh, capable of testing projects related to the company's web services.

##### Responsibilities:

- Create test plans based on system requirements and design and test the system.

necessary, plan quality improvement measures and instruct them to the developers.

- Automate testing and reduce the man-hours required for higher quality assurance.
- Improve developers' quality awareness and quality control techniques to reduce the number of defects.
- Review requirement definitions and design documents and point out problems.
- Manage the QA team.
- Understand the skills and aptitude of each QA engineer and create an optimal allocation of staff and schedule.
- Monitor all projects' quality status and progress broadly and adjust personnel assignments and schedules according to the situation.
- Report, communicate, and coordinate with overseas office members.
- Improve the QA process.
- If useful, research and evaluate the latest testing technologies and tools and adapt them to each project.

### Compensation & Other Benefits

- Weekly 2 holidays, Insurance, Gratuity
- Lunch Facilities: Full Subsidized
- Salary Review: Yearly
- Festival Bonus: 2
- Free Lunch, Tea, Coffee, and Snacks for refreshment, and a Contemporary Office environment in an excellent building and accessible location.
- Company trip and Opportunity to work in Japan (depending on the company situation).
