Job Title: QA Manual Tester

Company Name: Truelancer

Share

About the job

We are seeking a meticulous QA Manual Tester to join our team. The ideal candidate will have a passion for quality assurance and a keen eye for detail. As a QA Manual Tester, you will be responsible for ensuring the quality and reliability of our software products through thorough testing and attention to detail.

Roles & Responsibilities

- Develop and execute test cases and test plans to ensure the quality and functionality of our software products.
- Perform manual testing of web and mobile applications to identify defects, bugs, and usability issues.
- Document and track software defects and issues, and collaborate with development teams to ensure timely resolution.
- Conduct regression testing to verify bug fixes and ensure that previously identified issues have been addressed.

Minimum Requirements

- Bachelor's degree in Computer Science, Information Technology, or a related field.
- Proven experience as a QA Manual Tester or similar role, with a strong understanding of software testing principles and methodologies.
- Experience creating and executing test cases and test plans for web and mobile applications.
- Familiarity with bug tracking systems (e.g., Jira, Bugzilla) and version control systems (e.g., Git).
- Excellent analytical and problem-solving skills, with the ability to identify and troubleshoot software defects.

Preferred Skills

- Quality Assurance Tester, Japan
