### Job Title: QA Automation Team Lead

Company Name: Eleos Health

Share

#### Description

##### Who is Eleos Health?

Today, more people than ever are speaking publicly about their mental health. Whether it's ourselves, our friends and family, or even public figures, taking care of your behavioral health is no longer a taboo, it's vital, and it's only human. Eleos is on a mission to help deliver the world's most effective behavioral care through data, measurement, and personalization. Or, simply put, We want to give clinicians the support they need to do the important work only they can do.

##### What is this opportunity?

QA Automation Team Lead, you'll lead the automation development strategy & coverage, collaborating with cross-functional teams to ensure high-quality product releases. You'll guide a talented QA automation team, build and maintain automation frameworks, and drive continuous improvement in our automation efforts and processes. This is a great opportunity to shape the future of our quality efforts while working with cutting-edge tools and mentoring a growing team.

##### Who are you?

With a strong background in QA processes and automation tools, you excel in developing and maintaining automation frameworks. You're a natural problem solver, with excellent communication skills and a collaborative mindset. With a proven track record in leadership and team management, you're driven by the success of your team and are committed to fostering a culture of innovation and automation. Your leadership style is focused on empowering your team and fostering growth.

##### How will you contribute?

As a QA Automation Team Lead, you will oversee the development and execution of automation strategies, ensuring the team delivers high-quality, efficient test solutions. You'll manage and mentor a team of QA automation engineers, fostering a culture of collaboration and continuous improvement. By setting clear goals, prioritizing tasks, and streamlining processes, you will drive testing efficiency and effectiveness. Additionally, you'll collaborate with cross-functional teams to identify areas for improvement and ensure that automation efforts align with overall project objectives, contributing directly to the success of product releases.

##### Requirements

automation engineers

- Experience in prioritizing automation coverage and creating coverage visibility
- At least 3 years of experience as a QA automation engineer
- Experience with OOP, design patterns
