Job Title: Associate Staff Engineer (QA Automation Engineer)

Company Name: Nagarro

Share

Company Description

We are a Digital Product Engineering company that is scaling in a big way! We build products, services, and experiences that inspire, excite, and delight. We work at scale — across all devices and digital mediums, and our people exist everywhere in the world (18000+ experts across 37 countries, to be exact). Our work culture is dynamic and non-hierarchical. We are looking for great new colleagues. That is where you come in!

Job Description

In this role, you will utilize an automation test kit (framework and pre-defined test tools) to inspect, analyze, design, develop, implement, and execute reusable test cases. Your goal will be to ensure the quality of the solution and its architecture while aligning with prescribed enterprise quality practices and standards.

Required Skills:

- API Testing (Rest Assured)
- Selenium (Java)
- Cucumber (BDD)
- DevOps for QA
- Mobile Testing (Appium)
- Performance Testing (JMeter)
- Agile Team/Delivery Management
- Test-Driven Development (TDD)
- JIRA

Good-to-Have Skills:

- Azure DevOps (Capable)

Responsibilities:

- Lead quality engineering within squads, adhering to agreed test engineering and quality practices.
- Ensure alignment across stakeholders to optimize testing efficiencies across the product delivery stack.
- Maintain test effectiveness and foster healthy team dynamics.
- Design and implement re-usable test cases to assure solution quality.
- Align with enterprise quality practices and standards.
