### Job Title: Junior QA Engineer

Company Name: Moro Tech

Share

#### Description

#### Our Company

Moro Tech is a proud member of Moro Global with presence in Greece, Cyprus, Belgium and Japan, while we continue to transform and grow.

We support organizations at every step of their business-journey, from planning to execution, by adopting a hands-on approach and providing a powerful mix of business strategy, technical domain expertise and data centric solutions.

If you are the type of person who is committed to achieving outstanding results, shows up as their whole self and values diversity and inclusion, then be sure to check the job description below 'cause we are looking forward to meeting you!

#### The impact of the role:

As a Junior QA Engineer, you will play a key role in ensuring the quality and operability of our applications. Collaborating closely with developers, product teams, and other QA professionals, you'll contribute to delivering robust, high-quality solutions that meet user needs.

This is an amazing opportunity to be part of the future of the automotive industry. Together with your peers you will be working on a platform for one of the largest OEMs in the world. Your contribution is critical and will allow you to see the result of your work driving down the road in future vehicles! Being so close to cutting-edge technologies will allow you to further enhance your skills & thrive within an innovative technology environment.

#### On a given day, an Junior QA Engineer will:

- Collaborate with the development team to design, implement and execute test approaches on the system
- Develop and maintain automated test scripts using tools like Cypress, Selenium, or similar.
- Perform manual and automated testing on multi-component systems, including front-end interfaces, APIs, and third-party services.
- Validate customer requirements and communicate any issues to the development and product teams.
- Document testing processes, user journeys, and outcomes.
- Assist in integrating automated tests into the CI/CD pipeline.

**In order to be successful in this role you will need:**

- A degree in Computer Science, Engineering, or a related field.
- Basic programming skills in Java, JavaScript, Python, or similar languages.
- Strong analytical and problem-solving abilities.
- Basic database management concepts (SQL, NoSQL).
- Experience in designing flowcharts
- Basic bash scripting skills.
- Familiarity with Agile methodologies.
- Curiosity, attention to detail, and a willingness to learn new technologies.
- Excellent communication skills and a collaborative mindset.
- Fluency in English, as we are a multinational company.

**Nice-to-have:**

- Experience or familiarity with manual and automated testing tools such as Selenium, Cypress, or Appium.
- Understanding of API Testing and related tools like Postman/Newman.
- Relevant academic projects or internships in software testing.

**Requirements****Benefits****Benefits for you:**

- We value each individual's values and unique skill set:
- We offer a competitive remuneration package for what you bring in!
- We have all the right tools in place to enable your growth as our member, with performance feedback, Growth Plans, annual Salary Reviews and more!
- We take care of our people and value work life balance:
- We offer an advantageous Private Health insurance
- We offer extra paid time off per year
- We offer monthly Meal Vouchers
- We offer flexible working hours
- We have a people first approach and we are committed to providing our people the tools and power to thrive
- We offer an annual budget for training activities
- We offer a standard equipment package, plus the option to select additional gadgets from a variety of options, to personalize your workspace.
- We are location fluid with a work from anywhere mentality! Our offices offer a lot of collaboration spaces and are open for all of our Morotechies to come whenever they wish and collaborate in person!

*Please note that benefits may vary based on the location.*

**A glimpse at our principles:**

**We feel comfortable with the unknown.** We have embraced uncertainty and we feel comfortable with the unknown, as there is no other way to create lasting growth and real impact.

**We act with passion.** We succeed with passion and we fail with passion. Everything we do, our daily tasks, our long-term projects, internally and externally, the way we are chasing our dreams and vision, we do it passionately.

**We enjoy being diverse.** We are committed to fostering an environment where we can celebrate and embrace our diversity and each person's individuality so that people can bring their whole selves to work. A mosaic of personalities, views, perspectives, and crafts, is who we are. We wouldn't have been the same otherwise. So simple.
