Company Name: Tracking Pakistan

Share   

Tracking PK is Hiring the Mid-Level Manual QA Engineer

Seeking a Skilled **Mid-Level Manual QA Engineer** to Handle:

- Analyze and understand functional and technical requirements to create detailed and comprehensive test cases.
- Execute manual test cases across multiple platforms (web, mobile, desktop) to validate functionality, usability, and performance.
- Identify, document, and report bugs, defects, and issues using defect tracking tools (e.g., Jira).
- Perform regression, smoke, exploratory, and acceptance testing as needed.
- Collaborate with developers, designers, and product managers to resolve issues and ensure requirements are met.
- Validate bug fixes and coordinate testing efforts in alignment with release schedules.
- Actively participate in agile/scrum ceremonies, including sprint planning and retrospectives.
- Ensure adherence to quality standards and continuous improvement in QA processes.
- Prepare and maintain test documentation, including test plans, reports, and test data.
