

## ← Job Details

### Job Title: Software QA Engineer

Company Name: Rubikal

Share

#### Description

- You will ensure that our coaching platform is fantastic and high-quality
- Build product test strategies, write and execute test plans, file bugs, and communicate with the team about issues, risks, and product quality
- Identify and execute opportunities to improve the QA process
- Help educate others in Engineering and Product on testing and QA; work with them to determine product quality goals and measurements
- Work with engineering and support to triage inbound bug reports and reproduce reported issues
- Expand our end-to-end automated test coverage

#### Requirements

- You have at least 3 years of experience in Quality Assurance; 5+ years of experience strongly preferred
- You are passionate about the field of Quality Assurance and excited to grow and develop a career within QA
- You have a general facility with technology, and you can learn new technologies quickly
- You use excellent communication skills
- You are a good person to work with, get along with others, and can work effectively in a team
- You have a dedication to quality and a positive, collaborative attitude and approach to testing
- You are highly self-motivated; able to find opportunities for improvement and tackle them, without external direction
- Comfortable working in a dynamic, low-structure, constantly changing atmosphere and prioritizing work appropriately
- Project leadership experience in QA is strongly preferred

#### Benefits

- Competitive salary
- Medical Insurance
- Career development and growth opportunities
- Supportive and collaborative work environment
- Flexible working hours
