## Top Browser Extensions for QA Professionals: Boost Your Daily Workflow

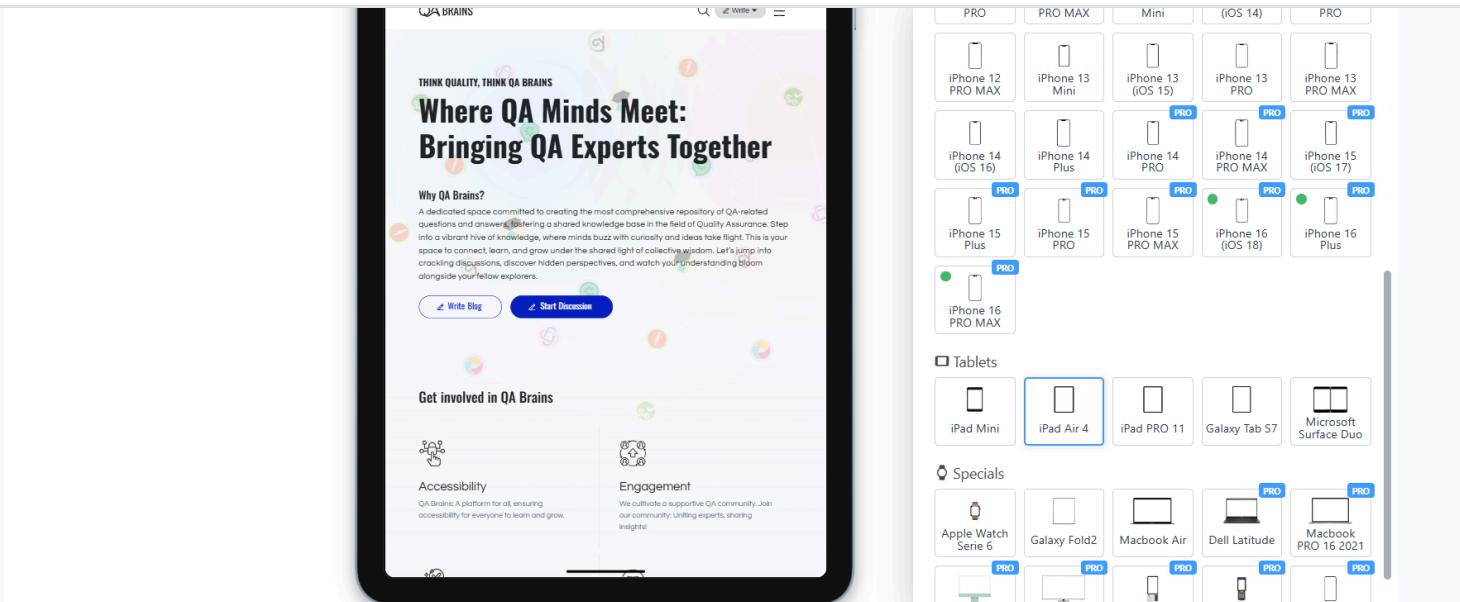

Wasif Zaman 11 Nov 2024 1 295 1

Share

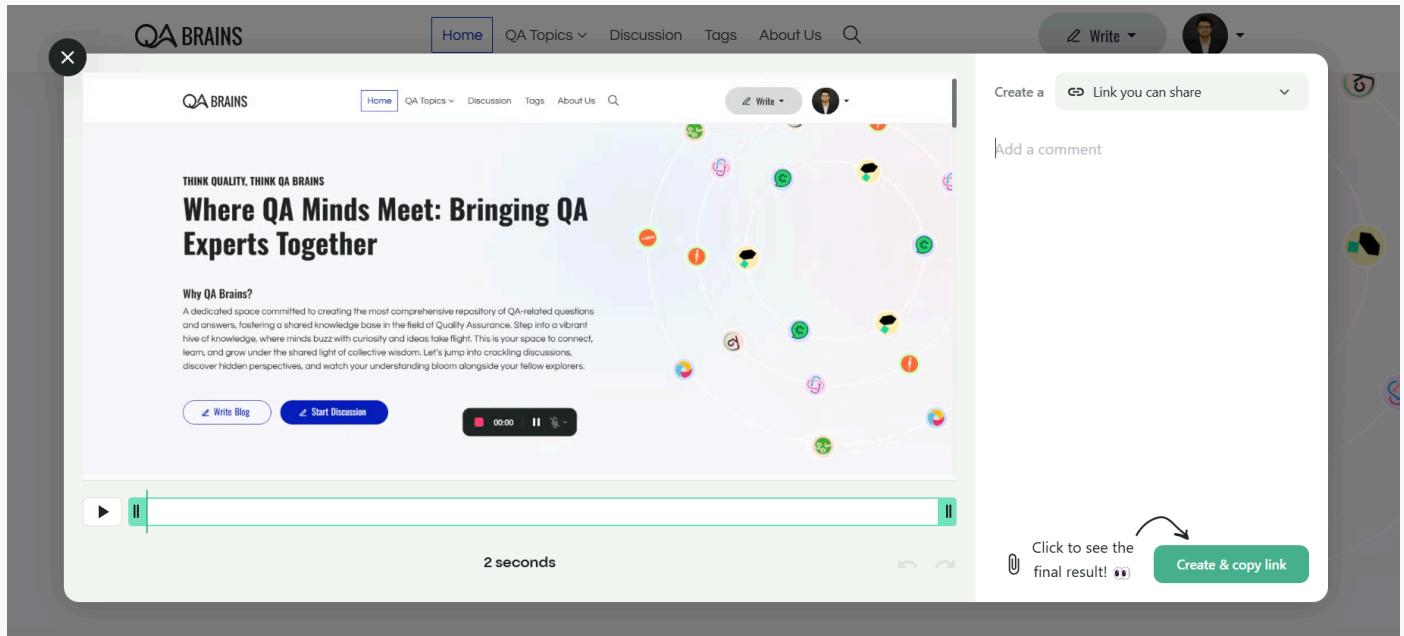

Browser extensions can be game-changers, offering quick access to features that simplify everything from debugging to UI checks, accessibility audits, and more. Here's a roundup of the top browser extensions that every QA Professional should consider to boost their daily workflow and take their testing game to the next level.

**Mobile simulator - responsive testing tool:** Very realistic desktop smartphone and tablet simulator with multiple devices and resolutions to test your mobile site.

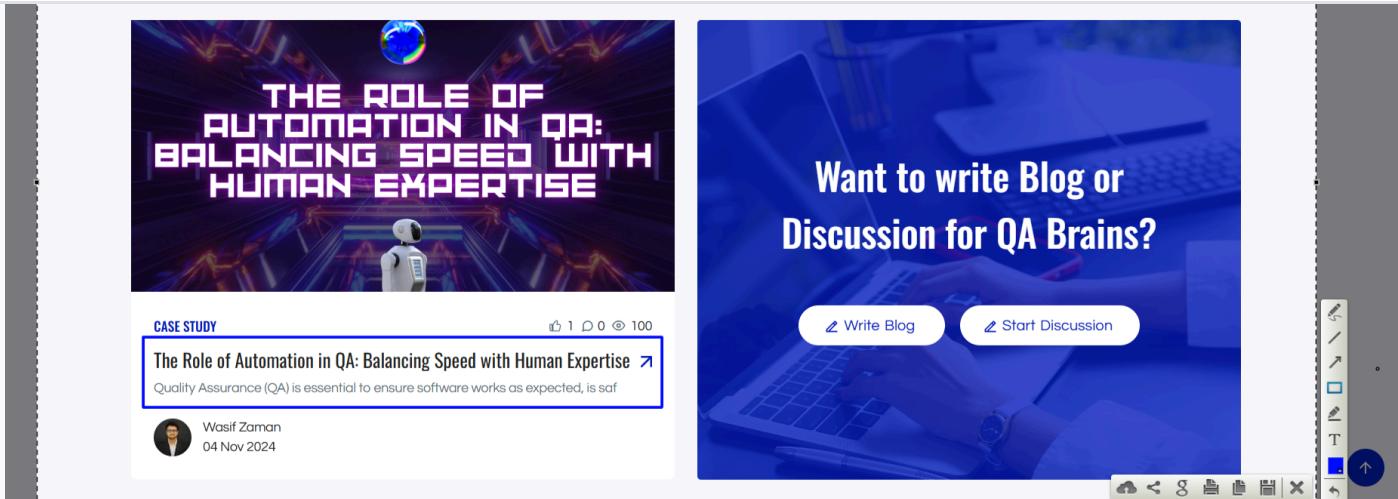

**Link:** <https://chromewebstore.google.com/detail/mobile-simulator-responsi/ckejmhbmlajgoklhgbapkiccekfoccmk>

**Jam:** One of the fastest bug-reporting tools. Jam integrates with the tools you already use (Jira, Asana, Slack, etc) to make it as quick as possible to file bugs exactly where they need to be.

**Link:** <https://chromewebstore.google.com/detail/jam/iohjgamcilhbgmhbnllfolmkmmekfmci>

**Lightshot (screenshot tool):** Simple and convenient screenshot tool. Select an area, edit your screenshot and upload it to the server.

Link: <https://chromewebstore.google.com/detail/lightshot-screenshot-tool/mbniclmhobmnbdlbpiphghaielnnpqgd>

**Check My Links:** Check My Links is a link checker that crawls through your webpage and looks for broken links. It highlights which ones are valid and which ones are broken, simple as that.

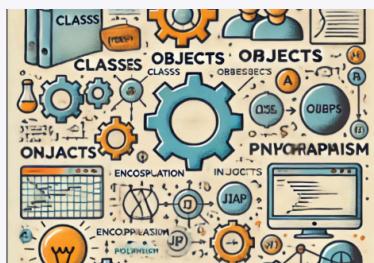

The screenshot shows the QA BRAINS homepage with the 'Check My Links' extension active. A sidebar on the right displays 'Link Results' with the following data:

Links: 50	Queue: 0
Caching: FALSE	Method: GET
Valid links: 50	
Redirect links: 0	
Warnings: 0	
Invalid links: 0	

The main content area features a network diagram where nodes represent web pages and connections represent links, some of which are marked with red slash icons indicating they are broken.

Link: <https://chromewebstore.google.com/detail/check-my-links/ojkcdjpcgfaekbeaelaapakgnjflfglt>

**Heading Tag Markup:** This extension visual highlights the h-Tag on every page. With the add-on "Heading Tag Markup" you can highlight the h1-h6 tag on the website.
