Job Title: Junior Software QA Engineer

Company Name: Lunit

Share fin X

Lunit is an abbreviation of "Learning Unit" and is a medical AI company that develops and provides Al solutions that contribute to cancer diagnosis and treatment. Lunit aims to open an era where more accurate cancer diagnosis and treatment effect prediction are possible through AI technology, and rapid customized treatment for patients is possible.

About the Team

Lunit's Enhancement Engineering department performs various tasks with the mission of providing the best user experience for Lunit's INSIGHT products in all countries and platforms. In addition to creating technically excellent products, it is also very important to create products that actual customers can choose. Our core role is to identify what environments actual users use our products in and what requirements they have, and to reflect these in actual products, and to ensure that these products are simple, convenient, and reliable.

About the Position

Software QA tracks whether Lunit's INSIGHT products are being developed appropriately according to certain requirements and ensures quality assurance for stable products that customers can trust. As a person with the highest level of expertise in the product, you will contribute to improving the perfection of the product so that customers can be satisfied in both functional and non-functional aspects.

Main tasks

- Quality assurance throughout the entire product development phase
- Performing verification and writing documents for product launch
- Improving work through the introduction of new processes and measures
- Responding to technical inquiries about the product and supporting analysis

Requirements

Qualifications

- More than 1 year of software QA experience
- Computer engineering major or software engineering knowledge
- Ability to communicate flexibly and actively with various collaborators
- Not shy about what you don't know or afraid to ask questions

Supmission documents

Korean resume (free format)

Selection process

- Document Screening → Competency-based Interview → Culture-fit Interview → Onboarding
- After the final interview, reference checks may be conducted if necessary.

>> Working conditions and working environment

- Employment type: Full-time
- Working location: Runit headquarters (374 Gangnam-daero, Gangnam-gu, Case Square Gangnam 2, 5th floor)
- · Salary: Determined after interview

- 1. If false information is found in the application documents, employment may be canceled even after confirmation of employment.
- 2. Persons who are protected by employment, such as national meritorious persons and persons with disabilities, will be given preferential treatment by relevant laws. Benefits
