Job Title: Jr. Manual QA Analyst
Company Name: TECLA

Share 🅕 🅛 🆇

TECLA is a fully remote software development company with a diverse and highly skilled team of 100+ experts across Latin America. We specialize in AI, cloud, automation, and DevOps, building innovative solutions for high-growth startups and established mid-market technology companies in the U.S.

Our work culture is agile, collaborative, and fast-paced—we take our work seriously while keeping the environment fun and engaging. As a remote-first company, we emphasize strong teamwork and close collaboration, working seamlessly with our U.S. partners as one integrated unit. Whether optimizing cloud environments, developing AI-driven applications, or enhancing DevOps automation, TECLA is at the forefront of technical innovation, solving complex challenges with cutting-edge technology.

Job Details:

We are seeking a meticulous and passionate Manual QA Engineer to join our growing team. As a key player in our product development process, you will be responsible for ensuring the quality and reliability of our platform. You'll conduct thorough end-to-end testing, identify and document defects, and collaborate closely with developers and product managers to deliver a seamless and engaging user experience.

Responsibilities:

- Conduct end-to-end user testing to ensure a seamless customer experience across all touchpoints.

- Develop comprehensive test plans, test cases, and test scripts based on product requirements and user workflows.

- Identify, document, and track defects, collaborating with developers and product managers to resolve issues.

- Maintain detailed and organized testing documentation, including test plans, test cases, and results for future reference.

- Analyze test results, provide actionable feedback, and drive continuous improvements in product quality.

- Participate in cross-functional meetings to review requirements and provide input from a QA perspective.

- Advocate for the end user by identifying usability issues and ensuring a high-quality user experience.

Required Skills and Qualifications:

- 2 years of experience in manual software testing, preferably in a web, e-commerce, or gaming environment.

- Strong understanding of software testing methodologies and best practices.

- Experience in developing and executing test plans, test cases, and test scripts.

- Proficiency in using bug tracking systems (e.g., Jira).

- Excellent analytical and problem-solving skills.

- Strong attention to detail and a commitment to quality.

- Excellent communication and collaboration skills.

- A passion for gaming and a deep understanding of player experiences.

- Experience with browser developer tools.

- Familiarity with various operating systems and mobile devices.

Preferred Qualifications:

- Experience with test management tools.

- Knowledge of agile development methodologies.

Work Schedule:

Flexible with required overlap from 9:00 AM to 2:00 PM Pacific Time.

What We Offer:

- The opportunity to work on a cutting-edge platform in the exciting gaming industry.

- A fully remote position with a structured schedule that supports work-life balance.

- Two weeks of paid vacation per year.

- 10 paid days for local holidays.

*Please note that we are only looking for full-time dedicated team members who are eager to fully integrate within our team.
