Job Title: QA Automation Engineer
Company Name: Workable

Share **f** **in** **X**

Description

Workable is the premier solution for over 31,000 growing businesses and HR teams seeking a comprehensive, all-in-one HR suite. We uniquely combine the world's most widely adopted Applicant Tracking System (Workable Recruiting) with a full-spectrum employee management system (Workable HR). At Workable, we empower companies to focus on what truly matters: hiring the right people and fostering their growth.

While we take HR seriously, we maintain a lighthearted and collaborative culture. At Workable, you'll find smart people who have fun, learn, innovate, and help others do the same. We respect everyone, hire the best, and ensure every experience is special.

We're growing fast, in both headcount and revenue, and we're looking for a QA Engineer to join our Engineering Team!

Your responsibilities will include:

- Drive software quality assurance lifecycle as part of Agile process and deliver high-quality releases on time
- Establish and coordinate test strategies with development/product teams, design and implement test plans and test cases
- Contribute to the maintenance of the web test automation framework
- Develop and execute automated UI and functional tests
- Daily reviewing test results and reporting issues
- Enhance and maintain automated CI flows
- Troubleshoot issues in systems under test

Requirements

- BS/MS degree in Computer Science, Engineering (or a proven strong background)
- 3+ years of experience as a Software Development Engineer in Test for a production environment
- Able to multi-task, be proactive in project planning and requirements gathering, set and maintain multiple priorities
- Excellent communication skills in English, particularly written communication
- Proven experience in mobile or web application testing
- Experience in at least one programming language – Java, Groovy (preferred), Ruby Python or Javascript

- Experience in Continuous Integration process, defect tracking, and test management tools such as Jenkins, JIRA, etc
- Attention to detail and the ability to triage - diagnose complex issues in application testing

We invest in training engineers in the technology stack we use. If you're an exceptionally good engineer who wants to work in a world-class software company, you're in the right place.

Benefits

Our employees enjoy benefits that make them more productive and contribute directly to the development of their professional skills. We want to be able to attract the best of the best and make sure they keep getting better. On top of an exciting, vibrant, and intellectually challenging environment, we are offering:

💼 Comprehensive Health Coverage: A robust health insurance plan that includes coverage for your dependents.

💰 Competitive Compensation: An attractive salary paired with a performance-based bonus plan.

🏠 Flexible Work Model: Enjoy the best of both worlds with a hybrid setup—two days working from home and three in the office.

🖥️ Top-Tier Tools: Apple gear and access to the latest productivity tools to help you excel.

📱 Stay Connected: A mobile data plan to keep you online wherever you are.

🍴 Delicious Perks: Fresh, tasty food at the office to fuel your productivity.

🌴 Generous Time Off: Take the time you need to relax and recharge with our ample PTO policy.

✈️ Relocation Bonus: To help you settle in smoothly in Athens.

Workable is most decidedly an equal opportunity employer. We want applicants of diverse backgrounds and hire without regard to color, gender, religion, national origin, citizenship, disability, age, sexual orientation, or any other characteristic protected by law.
