Company Name: Trinetix

Share   𝐟   in   𝕏

Description

We are looking for a skilled QA Engineer who is willing to apply his current knowledge and skills and is inspired to discover new technologies. Project: a knowledge exchange portal where any EM should fill in the proper data by the end of the Project to be able to anyone of any other practitioners to obtain the experience that he is looking for.

Your future dynamic and friendly team consists of developers (back-end and front-end), QA engineers, application architects, technical delivery managers, and business systems analysts.

Must-Haves:

- 2+ years of web application testing
- Strong knowledge of software testing types and the ways to apply them
- Experience in requirements analysis, effort estimating, and task scheduling
- Basic knowledge of client-server architecture and API
- Experience with testing cloud-based, microservice solutions testing
- Ability to troubleshoot issues and investigate root causes of bugs
- Ability to set own tasks and organize work efficiently
- Excellent communication skills, analytical and troubleshooting abilities
- Intermediate level of English
- Experience with at least 1 task-tracking tool (preferably TFS or Jira)
- Deep understanding of Agile Software Development methodology (SAFe in particular)

Nice to Have:

- Experience with performance/load testing
- Knowledge in Postman
- Experience with version control systems
- Basic knowledge of any programming language with an engineering background.
- Basis test automation skills

Primary Job Duties:

- Perform manual testing of enterprise applications with multiple web user interfaces
- Develop test cases, test scripts, and acceptance criteria to ensure adequate test coverage

What we offer:

- Paid training programs and English language courses;
- Medical insurance and sports program compensation;
- PE and legal support;
- Comfortable working hours;
- Awesome team events and a wide variety of knowledge-sharing opportunities.

Who We Are:

We are trusted digital product partners for world-renowned enterprises and fast-growing businesses globally. We achieve this by efficiently implementing tech innovation, solid professional expertise, and a solution-driven approach. Our "hand-in-hand" work results in innovative, customized software development and design solutions that put our clients miles ahead of the competition.

We empower forward-thinking leaders to bring impactful ideas to digital reality through partnership, creativity, and innovation. Headquartered in the US, we are in the process of developing and implementing our expansion into several Global markets. Our business is going through transformational change, and this is an exceptional opportunity to join and influence a company that is breaking ground in evolving markets.
