Job Title: Senior Quality Assurance Engineer

Company Name: Wello

Share 🅕 🅛 🆇

Responsibilities:

- Communicate with product teams to draft test cases and coordinate with development teams on the test cases.
- Collaborate with developers to validate versions using test cases.
- Conduct basic tests on daily builds and release version testing.
- Design and execute tests according to project requirements, ensuring test quality.
- Maintain a bug list and work to enhance product quality, tracking and analysing test issues, and encourage related teams to optimise.
- Manage product release cycles and take responsibility for the quality of the final release.

Requirements:

- Bachelor's degree or higher in Computer Science or a related field, with 5+ years of work experience.
- Knowledgeable in software testing theories, processes, and methodologies.
- Proficient in test design methods to analyze requirements.
- Familiar with API testing tools, such as Postman and Apifox.
- Experience in back-end automated testing is preferred.
- Prior experience in testing for the global payments industry is a plus
