Job Title: QA Automation Tester
Company Name: Incedo

Share 𝕗 𝗂𝗇 𝕏

Company Overview

Incedo is a US-based consulting, data science and technology services firm with over 2,800 people helping clients from our six offices across US and India. We help our clients achieve competitive advantage through end-to-end digital transformation. Our uniqueness lies in bringing together strong engineering, data science, and design capabilities coupled with deep domain understanding. We combine services and products to maximize business impact for our clients in telecom, financial services, product engineering and life science & healthcare industries.

Working at Incedo will provide you an opportunity to work with industry leading client organizations, deep technology and domain experts, and global teams. Incedo University, our learning platform, provides ample learning opportunities starting with a structured onboarding program and carrying throughout various stages of your career. A variety of fun activities are also an integral part of our friendly work environment. Our flexible career paths allow you to grow into a program manager, a technical architect or a domain expert based on your skills and interests.

Role Description

Role Description:
As a Senior Automation - Functional Testing Specialist at Incedo, you will be responsible for designing and executing test cases and scripts to ensure the functionality of software products and applications. You will collaborate with cross-functional teams to identify and resolve defects and provide recommendations for improvements to the development team.

Roles & Responsibilities:
• Design and develop automation functional testing solutions using tools such as Selenium and Appium.
• Collaborate with stakeholders to gather and analyze requirements and design solutions that meet business needs.
• Configure and deploy automation functional testing solutions, and troubleshoot technical issues as needed.
• Develop and maintain documentation, including user guides and training materials.

Technical Skills

Skills Requirements:

- Knowledge of scripting languages such as Python or JavaScript
- Experience with Test Automation frameworks and best practices
- Familiarity with Agile testing methodologies
- Must have excellent communication skills and be able to communicate complex technical information to non-technical stakeholders in a clear and concise manner.
- Must understand the company's long-term vision and align with it.
- Provide leadership, guidance, and support to team members, ensuring the successful completion of tasks, and promoting a positive work environment that fosters collaboration and productivity, taking responsibility of the whole team.

Nice-to-have skills

- API Testing.

- Exposure to Mobile App testing is an added advantage.

Qualifications

Qualifications

- 4-6 years of work experience in relevant field
- B.Tech/B.E/M.Tech or MCA degree from a reputed university. Computer science background is preferred

Company Value

We value diversity at Incedo. We do not discriminate based on race, religion, color, national origin, gender, sexual orientation, age, marital status, veteran status, or disability status.
