Job Title: Junior QA Engineer
Company Name: Globaldev Group

Share f in X

Description

Our passion is to make the most entertaining and innovative slot games possible. We provide a premium quality experience using HTML5, giving cross-platform compatibility over a full range of devices. Combining math-based game design and creativity, we make the games players want to play.

You can't just be good. You've got to be great. And that's what we strive for every day.

Responsibilities:

- Manual testing of new slot game applications;
- Creation of Test Cases and test Reports;
- Estimation of testing efforts for the project;
- Creating detailed tickets to track bugs;
- Discussions and problem-solving particularly in English;
- Documenting all issues that could be appeared, etc.

What Makes You A Strong Candidate:

- Slot games understanding;
- Good knowledge and understanding of testing theory;
- General understanding of Software Development Life Cycle, Bug Life Cycle;
- Familiarity of Agile (Scrum, Kanban) and Waterfall;
- Basic knowledge of Jira, Confluence;
- Understanding of CI and VCS systems (Jenkins, GIT);
- Test design techniques knowledge;
- Basic knowledge of Excel;
- Be ready for strict timelines;
- To be responsible during project development;
- Intermediate English (reading and writing documentation in English).

Benefits:

- Yearly learning and development budget up to EUR 300 (after the probation period);
- Health insurance with premium-level clinics;
- 20 working days per year is a Non-Operational Allowance and settled to be used for personal recreation matters and are compensated in full;
