Job Title: QA Functional Engineer I
Company Name: ConnexPay

Share 🅵 🅛 🆇

The Company

Founded in June 2017, ConnexPay is the first payments company to seamlessly combine both PayIns and PayOuts into a single global platform that is transforming modern e-commerce. The flexibility of ConnexPay's technology allows clients to manage all of their B2B payment needs, from acquiring sales, managing fraud, and paying suppliers. ConnexPay's solutions are applicable across a broad spectrum of corporate payment use cases, including global travel, ticketing, insurance and warranty claims, loyalty and rewards, and media and advertising. The company's technology reduces payment risk and lowers the cost of payment acceptance. Through our people, ConnexPay is poised to become the industry leader in payments.

ConnexPay is proud of our culture, where we focus on employee engagement and customer satisfaction. Here our people feel comfortable voicing their opinions, which helps us build a safe environment for all. We are customer focused and truly believe that behaviors drive our culture — and our culture drives our results — always working as one team to win.

The Opportunity

The QA Functional Engineer will play a crucial role in ensuring the highest quality and reliability of our software and technology solutions. This role will work closely with cross-functional teams, including software developers and product managers, to design and execute test plans, identify and report defects and verify bug fixes. The QA Functional Engineer's attention to detail, analytical mindset, and problem-solving skills will contribute to the successful delivery of top-notch I.T. products and services. This position will report to the QA Manager.

Key Responsibilities

Design test cases and scenarios to cover all aspects of functional and non-functional requirements using Jira.

Conduct regression testing to ensure that code changes and enhancements do not adversely impact existing functionality.

Develop and maintain automated test scripts using appropriate testing frameworks and tools.

Work closely with the product and development teams to address issues, clarify requirements, and drive defect resolution.

Propose ideas and contribute towards the enhancement of QA methodologies, best practices, and standards.

Qualifications

Bachelor's degree in Computer Science, Information Technology, or a related field.

2+ years of proven experience in manual and/or automated testing techniques.

Ability to communicate with developers, product managers and other cross functional members of a team.

Ability to work remotely.

Ability to develop functional, regression and user-focused test plans and strategies using product requirements and design documents.

Experience with Atlassian stack (JIRA, Confluence, Bitbucket).

Proficiency in writing test scripts in Jira for both UI and RESTful API scenarios.

Proficiency in performing ad hoc RESTful API testing using Postman and/or SoapUI.

Intermediate understanding of HTML and CSS.

Benefits and Perks

ConnexPay offers an attractive compensation package reflecting the scope of the role. Other benefits include:

Unlimited PTO: Freedom to take time off with no assigned set number of days.

Retirement savings: Immediate entry into 401(k) plan with company match.

Excellent benefits: Medical, dental, and vision insurance options, plus company-paid life and AD&D insurance.

Flexible work locations: Work from home, an office, or wherever you feel comfortable and productive.

EEO

ConnexPay is an Equal Opportunity Employer and does not discriminate against any employee or applicant because of race, color, sex, age, national origin, religion, sexual orientation, gender identity, status as a veteran, and basis of disability or any other federal, state, or local protected class.
