Job Title: Software Quality Assurance (SQA) Engineer

Company Name: Shikho

Share **f** **in** **X**

The Role:

As a Software Quality Assurance Engineer at Shikho, you will play a crucial role in ensuring the quality, reliability, and performance of our software and products. You will collaborate with cross-functional teams to identify, document, and resolve issues, contributing to the seamless operation of our platform. The ideal candidate should have a strong foundation in QA methodologies, testing tools, and automation frameworks, along with a proactive approach to problem-solving and a passion for technology.

Key Responsibilities:

• Review requirements, specifications, and technical design documents to provide timely and meaningful feedback.
• Perform functional, smoke, sanity, usability, and regression testing on each release.
• Create detailed, comprehensive, and well-structured test cases based on requirements.
• Contribute to the overall automation effort, including test case development and automation framework enhancements.
• Identify and log bugs, working collaboratively with the development team to resolve them.
• Manage multiple projects simultaneously, effectively prioritizing tasks to meet deadlines.
• Participate in scrum meetings, planning sessions, and scoping activities, ensuring alignment with project goals.
• Continuously learn and adopt new technologies, tools, and techniques, and ensure knowledge transfer within the team.
• Conduct API testing and ensure system robustness across all integrations.

Qualifications & Skills:

• Graduation in Computer Science & Engineering from a reputed university

• At least 2 to 3 years of experience in Software Quality Assurance

• Strong understanding of SDLC, software QA methodologies, tools, and processes.
• Proven experience with UI automation frameworks such as Cypress or Selenium WebDriver.
• Proficiency in testing tools like TestNG or JUnit, and expertise in API automation frameworks.
• Hands-on experience with performance testing tools like Gatling or JMeter.
• Familiarity with the Agile development process and project management tools like JIRA or Azure

• Experience working with relational databases, preferably MS SQL Server.
• Basic knowledge of version control systems (Git, Bitbucket, SVN).
• A proactive, self-starting attitude with the ability to work independently and efficiently.

The Important Bits:

Job Type: Full-Time
Department: Technology - Engineer
Location: Banani, Dhaka/Remote
Salary: Competitive and negotiable based on experience
Working Days: 5 days a week (Sunday to Thursday), 10 AM to 6 PM
Other Benefits: Festival Bonus, Annual Leave, Leave Encashment, Insurance Coverage, Annual Appraisal, etc.

About Shikho:

Shikho is a Bangladeshi education technology start-up with a mission to democratize access to high-quality education. It has so far raised $6.5 million USD of international funding from global venture capitalists in Singapore and America, the highest for a Bangladeshi seed-stage startup and the highest in education technology for the country. Investors include education technology investment specialists Learn Capital from Silicon Valley, regional experts Wavemaker Partners from Singapore along with the Family Office of Singtel Chairman and local partner SAJIDA Foundation. Shikho aims to build a holistic learning ecosystem for a digitally enabled Bangladeshi student population, across primary, secondary, and tertiary education.
