Job Title: Test Automation Engineer, KL

Company Name: Pixl8 Group

Share 🅕 🅛 🆇

Description

We are Pixl8 Group; a technology company providing the best digital solutions, for people-based businesses. We are passionate about harnessing technology to deliver exceptional digital experiences. We believe in the power of collaboration, innovation, and pushing the boundaries of what is possible.

https://pixl8.com

Specialising in the integration of highly personalised tech, our suite of products and services give businesses fully-customisable and off-the-shelf solutions, they control. Our clients include the Federation of Small Businesses, National Union of Journalists, The Institute of Structural Engineers and The Bar Council.

Since 2001 we've worked with hundreds of organisations to build integrated websites, CRMs, bespoke software and have now consolidated our expertise into flourishing products such as ReadyMembership (https://www.readymembership.com) and EventFolio, based on our open-source Preside Platform (https://preside.org).

Operating globally, Pixl8 Group Ltd is seeking a dedicated and skilled mid-level Test Automation Engineer to join our dynamic team in Kuala Lumpur. As a Test Automation Engineer your core accountabilities are as follows:

Test automation development - including collaborative testing, continuous integration and defect management

Documentation, planning and reporting

Stay up to date with the latest trends and best practices and recommend new testing tools and methodologies

The Role

Pixl8 has a team of over 60 specialists in digital development, design, marketing strategy and project management. The Product team at Pixl8 are responsible for developing the ReadyMembership platform and other products which are used to deliver outstanding solutions to the association and membership sector. We are passionate about our work and looking for a Test Automation Engineer to develop and execute exploratory and automated tests to ensure product and bespoke client project quality.

our testing processes. This is a fantastic opportunity for someone who is passionate about technology and quality assurance.

You will have worked in other technology product organisations and it is highly desirable that you have practical experience of digital product implementation processes. You will be familiar with a range of technologies including CMS and CRM or event management software.

This is primarily a remote role, based in Kuala Lumpur, with some time expected to be spent in our office in Petaling Jaya, Selangor (to be agreed with your Line Manager) and requires close coordination of development support both locally and with global teams.

You'll work with the team to...

Test Automation Development:

- Develop and maintain Cypress-based test automation frameworks for web applications using our extended framework
- Write, execute, and maintain end-to-end and integration tests
- Create and maintain test data that can be installed and removed as part of the testing workflow
- Utilise TestTrek our in-house developed platform

Collaborative Testing:

- Collaborate with cross-functional teams to design and implement effective test strategies
- Collaborate with the Service teams QAs to support test generation with client projects
- Participate in design and code reviews to ensure testability and quality

Continuous Integration:

- Work with the platform team to understand and support the CI/CD running of tests using Gitlab

Defect Management:

- Identify, document, and report software defects
- Track and resolve defects, working closely with developers

Documentation and Reporting:

- Maintain detailed automation-related test documentation, test plans, and test cases
- Prepare reports on testing activities and outcomes

Stay Updated:

- Keep abreast of the latest trends and best practices in Cypress and automation testing
- Explore and recommend new testing tools and methodologies

Requirements

development skills and understanding of Test automation frameworks.

- Proficiency in Git for version control
- SQL database proficiency would be beneficial
- Experience with API testing tools and techniques
- Excellent problem-solving and debugging skills
- Familiarity with Agile development processes
- Strong communication skills and a team player
- Proactive and self-motivated with a passion for software quality
- Experience with performance and load testing
- Knowledge of additional testing tools or frameworks
- ISTQB or similar certification is a plus

Do you share our values?

Above & beyond

- Continuous improvement and stretching our limits is our default mindset

Always accountable

- Our teams take responsibility to deliver excellence

Authentic & conscientious

- We are honest and work with integrity at all times

People first

- Our people are our greatest asset and are our source of strength

Curious & driven

- We have an appetite to discover innovative methods that simplify and accelerate success

Benefits

- We are always keen to hear from applicants that would be interested in working hybrid, flexible hours.
- 18 days of holiday + recognised/agreed public holidays
- Remote working allowance
- Healthcare scheme
- Company socials and team trips
- Ongoing personal development
- Collaborative and dynamic work environment

Performance bonus

well as London).

We believe in a great work-life balance - we do the work and log the time but also understand needing time for family and other responsibilities

Salary

The salary for this role is based upon experience but will range from RM 6,000 to RM 8,000 per month.

ISO

You'll carry out your role by the ISO/IEC 27001 requirements as reflected in the Company's policies and procedures and the ISO/IEC 27001 organizational structure charts.
