About the job

Project description

We are looking for an experienced QA Engineer to join our team. Your role will be key in ensuring the quality and reliability of our web applications and APIs. We seek a candidate with a strong background in test automation and data quality, who is also a fast learner. Familiarity with the financial domain, including benchmarks, portfolios, and balancing, would be advantageous.

Responsibilities

Perform testing on web interfaces and APIs to ensure they meet functional requirements.

Develop and maintain automated test scripts using TOSCA.

Use SQL to validate data accuracy and integrity.

Conduct data quality assessments in data warehouses and ETL tools.

Collaborate with development teams to integrate testing into CI/CD pipelines.

Skills

Must have

minimum of 7 years in QA Automation.

Proficiency in testing web interfaces and APIs.

Experience with test automation tools such as TOSCA.

Strong knowledge of SQL and Python for creating test scripts.

Familiarity with data warehouses and ETL tools for quality testing.

Understanding of CI/CD processes and integration.

Fast learner with the ability to adapt to new technologies and tools.

Nice to have
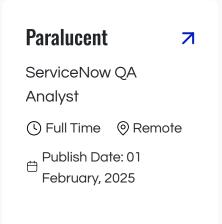

Experience with Palantir Foundry.
